Client: Any public sector body procuring services through the CCS G-Cloud 15 Framework (“the Framework”).

3. Scope of Services

CNX provides a comprehensive Infrastructure Assessment Service (“the Service”) designed to help NHS organisations evaluate, modernise, and optimise their digital

estates. The Service delivers a complete review of current datacentre infrastructure, cloud readiness, performance, security, and cost efficiency and includes:

- Comprehensive assessment of datacentre infrastructure covering compute, storage and networking.
- Detailed cloud readiness review.
- Evaluation of systems performance, capacity, utilisation, risks and technical constraints.
- Cloud migration options appraisal including hybrid, on-premise, and full-cloud models.
- Review of backup, recovery and continuity arrangements.
- Cost analysis comparing on-premise, hybrid, and cloud hosting.
- Architectural mapping identifying dependencies, legacy systems, and modernisation opportunities.
- High-level review of datacentre licensing and support contract dependencies.
- Final report providing roadmap, recommendations, timelines, and executive summary.

Each engagement's scope, deliverables, and pricing will be set out in a CCS Call-Off Order Form, including any schedules permitted under the Framework.

All services will be delivered strictly within the boundaries permitted under the Framework.

4. Relationship to CCS Terms

These Supplier Terms supplement and must be read alongside the CCS Terms.

Where there is a conflict, the CCS Terms shall prevail in all cases.

5. Supplier Responsibilities

CNX shall:

- Deliver the services with reasonable skill, care, and diligence.
- Provide qualified personnel and maintain continuity of key resources where possible.
- Comply with all applicable UK laws.

- Inform CNX of planned outages or change freezes that could impact discovery.

7. Information Governance & Data Protection

- No data will be transferred outside the UK without explicit written consent and appropriate GDPR safeguards.
- CNX complies with GDPR and Cyber Essentials standards.
- Data protection obligations shall follow the CCS 'Order Form' which takes precedence over these Supplier Terms in the event of conflict.

8. Intellectual Property Rights (IPR)

- Pre-existing IP remains the property of its originator.
- Deliverables created specifically for the Client may be used by the Client in perpetuity for internal governmental purposes, in accordance with CCS Intellectual Property Rights Schedule.
- CNX retains ownership of any proprietary frameworks, templates, and automation logic used to deliver the Service.
- The Client may continue to use deliverables post-contract for internal, non-commercial purposes.

9. Confidentiality

Both parties agree to maintain strict confidentiality of all information shared under the Agreement and not disclose such information to any third party without written consent unless required by law.

The duration that this obligation remains in force is in line with CCS Call-Off Contract.

12. Term and Termination

- Termination rights are as set out in the Call-Off Contract.

- Services will be delivered with reasonable care and skill.
- Personnel will possess appropriate qualifications and experience.
- Deliverables will conform to agreed specifications at the time of delivery.

14. Liability

15. Dispute Resolution

Both parties shall attempt to resolve disputes amicably through good-faith discussions before escalating to formal legal proceedings.

16. Force Majeure

Neither party shall be liable for delays or failure to perform obligations due to events beyond their reasonable control (e.g. natural disasters, cyber incidents, strikes, or government action).

17. Governing Law and Jurisdiction

This Agreement and all related Call-Offs are governed by and construed in accordance with the laws of England and Wales.

The parties submit to the exclusive jurisdiction of the courts of England and Wales.
