

Nymo Patient Flow Manager

G-Cloud Specific Pricing

1. SERVICE OVERVIEW

Nymo Patient Flow Manager is a comprehensive patient flow solution designed to streamline hospital operations by optimizing bed management, patient care, and resource allocation. It supports healthcare teams in delivering timely and effective care by providing real-time data on patient status, resource needs, and care requirements.

Key Benefits:

- Improved patient safety and experience
- Optimized resource allocation
- Real-time updates on patient status
- Paperless and digital care coordination

2. PRICING DETAILS

The pricing for Nymo Patient Flow Manager is based on the number of beds within the healthcare facility.

User	1-100 Beds	101-250 Beds	251-500 Beds	500+ Beds
Annual License per Bed	£325.00	£325.00	£275.00	£225.00

ADDITIONAL CHARGES:

- Annual Support: £35,000.00 (flat rate, regardless of bed count)
- Standard Implementation: £90,000.00 to £120,000.00 (one-off, based on scope)

4. IMPLEMENTATION METHODOLOGY

Nymo Patient Flow Manager follows a proven 4-phase approach to implementation, designed to ensure seamless integration and effective adoption:

- 1.Pre-project planning: Needs analysis and solution demonstration.
- 2.Configuration & Installation: Customization and setup based on specific requirements.
- 3.Training: Comprehensive training for end-users and system administrators.
- 4.Go Live & Support: Smooth transition to live usage with ongoing support.
