Pricing for G-Cloud 15

iBabs Board Portal gives boards and committees a full, real-time overview of everything that matters: upcoming agendas, meeting packs, decisions, action items, approvals, and a structured archive, all in one secure environment. It supports end-to-end governance with digital document distribution, collaboration, video conferencing, and voting, so everyone stays aligned before, during, and after the meeting.

Additional capabilities:

iBabs Debrief adds an AI-powered wrap-up to the same workflow: upload or record your meeting and automatically generate transcripts, speaker mapping, summaries, and meeting-ready minutes. Review and edit in-platform, then publish the outcome securely.

With **iBabs Publish**, you can share the right information with the public in one accessible, branded portal, making agendas, decisions, documents, and publications easy to find, and strengthening transparency and trust.

Security and compliance

At iBabs security is a top priority to ensure your confidential data remains protected. Our platform is fortified with 256-bits AES encryption and adheres to ISO 27001 and ISO 27002 certifications. Additionally, we are completely GDPR-compliant with all servers securely hosted in the EU.
