Wuluf Ltd Service Description Document

G-Cloud 15

Service Title: Cyber Security and Risk Management.

Service Description:

Wuluf Ltd provides a comprehensive cyber security consultancy service designed to strengthen organisational resilience, enhance regulatory compliance, and reduce exposure to emerging threats.

Our consultancy offering spans governance, risk, compliance, security architecture, awareness, and data protection, ensuring that organisations receive tailored, expert support across all areas of cyber risk management. Each service is delivered by experienced, security-cleared professionals with extensive knowledge of industry standards and regulatory frameworks, enabling clients to operate securely and confidently in increasingly complex environments.

As part of our consultancy suite, Wuluf Ltd delivers a structured four-week Compliance Readiness Assessment, designed to evaluate organisational alignment with regulatory and industry standards. This assessment includes detailed gap analysis, control validation, risk prioritisation, and the development of actionable remediation plans to support readiness for key audits and certifications such as GDPR, ISO 27001, NCSC Cyber Assessment Framework (CAF), and NIST. The service ensures organisations understand their current compliance

posture and receive clear, pragmatic guidance on achieving and maintaining certification requirements.

Wuluf also provides targeted visual security awareness campaigns tailored specifically for remote workers, addressing common risks such as phishing, credential theft, insecure Wi-Fi usage, and device compromise. These awareness packages deliver practical, easy-to-follow guidance to promote safe remote working practices and reinforce positive security behaviours across distributed teams. Pricing is applied per awareness package, offering a flexible way for organisations to enhance staff awareness without significant operational burden.

To support organisations in meeting data protection obligations, Wuluf offers a dedicated GDPR Compliance Consultancy service. This service helps organisations assess data handling practices, implement effective privacy controls, and ensure alignment with regulatory requirements.

Our consultants conduct GDPR gap analyses, data protection impact assessments, policy and procedure development, and ongoing advisory support to reduce exposure to breaches and regulatory fines. This consultancy is delivered on a six-month engagement basis, providing organisations with sustained guidance and accountability as they mature their privacy controls.

Our Risk Management & Mitigation service helps organisations identify, assess, and reduce cyber security and operational risks through a structured and repeatable approach. Wuluf conducts risk assessments, prioritisation workshops, and the implementation of appropriate technical and organisational controls, ensuring alignment with frameworks such as ISO 27001 and the NIST Cybersecurity Framework. This service strengthens organisational resilience and enables regulatory compliance by providing a clear understanding of risk exposure and a roadmap for mitigation. Pricing is set per day, allowing organisations to scale support based on the complexity and maturity of their risk environment.

Wuluf Ltd also provides Security Design & Architecture Support, enabling organisations to embed robust security principles into system, application, and infrastructure architectures from the earliest stages of development. Our service includes threat modelling, secure design reviews, network segmentation strategies, and alignment with established frameworks including ISO 27001, NIST, and Zero Trust principles. This ensures that systems are designed with security at their core and remain resilient from inception through to deployment. Pricing for this service is applied per day, offering flexible engagement options to meet project-specific needs.

Through this integrated consultancy offering, Wuluf Ltd delivers tailored, high-quality cyber security expertise that supports organisations in achieving compliance, reducing risk, enhancing awareness, and building security-led environments. Our flexible engagement models, experienced consultants, and commitment to best practice ensure that each client receives a service that is proportionate, actionable, and aligned to their strategic objectives.
