Service Title: Objective Connect

Objective Connect

Designed specifically for government and regulated industries, Objective Connect is a secure external file sharing and document collaboration application that gives complete control over the information shared outside an organisation.

Objective Connect - Integration

Objective Connect offers integration via the Connect Public API, or via Connect Link, and the pricing details the costs around this:

Connect Link: provides the deep integration between a document management system and Objective Connect, enabling both systems to synchronise files in real-time and always

ensure information governance. There is a one-off installation charge for Connect Link (if required) to cover service costs.

Objective Connect Public API: This powerful API allows customers to enhance process flows via dedicated workflow engines, feed metrics into data visualisation tools, or developing bespoke integrations with existing systems.

Connections Model

Unlike other collaboration platforms, Objective Connect is not priced based on storage limits or on a per-user basis. The unit of currency within Objective Connect is called Connections. Connections are calculated according to the number of documents uploaded to each secure workspace and the number of parties who can see them.

- Documents x Parties = Connections

When an organisation subscribes to Objective Connect, they subscribe to a defined number of Connections.

- 1 Document x 2 Parties = 2 Connections
- 10 Documents x 2 Parties = 20 Connections
- 1 Document x 20 Parties = 20 Connections

Connections can be recycled by either removing participants from a workspace, deleting documents or closing the workspace.

Objective Connect - Annual Subscription

Objective Connect G-	Annual Subscription - GBP Ex-VAT	
Volume of Connections - Subscription Level	Enterprise Edition	Enterprise Edition + Connect Link/API
10,000	£14,999	£26,985.11
