#### **Service Title: Secure by Design**

#### **Service Description:**

Wuluf Ltd offers a comprehensive suite of Secure by Design (SbD) services to help organisations embed security principles across the full product and systems lifecycle, ensuring security is integrated, evidenced, and auditable from concept through to deployment and beyond.

Our Secure by Design Framework Assessment & Gap Analysis evaluates how effectively security is built into key business practices through targeted policy and control review, threat modelling, and architecture analysis, culminating in clear findings and an actionable, prioritised remediation plan aligned to SbD principles. In addition, Wuluf provides hands-on Secure by Design consultancy to support the planning, evidence gathering, and delivery of SbD activities, helping teams implement practical security-by-design practices throughout discovery, design, build, release, and operational stages.

We also offer Secure by Design (SbD) Compliance Guidance & Documentation consultancy, supporting organisations to align development practices with SbD expectations through policy creation, control mapping, compliance documentation, and compliance integration, ensuring
