## Managed Penetration Testing & Remediation Support Pricing Schedule

### G-Cloud 15 - Lot 3 (Cloud Support)

Date: 30 January 2026

Document version: 2.0

**Delivery model:** The Supplier acts as prime contractor managing the engagement end-to-end. Technical testing and certified assessor review are delivered by an approved specialist testing partner. Final evidence and reporting are provided within the Supplier assurance pack. Where CREST-accredited reporting is required, the CREST report is issued and branded by the accredited testing partner.

**Accredited reporting:** Where the Buyer requires a specific accreditation/brand (for example, CREST), the Supplier will deliver via an appropriately accredited testing partner. This may be priced separately depending on scope and accreditation requirements.

### 1. Package pricing

All package prices are per engagement and exclude VAT.

| Package                                                       | Scope                                                                          | Included targets                                       | Price (ex VAT) |
|---------------------------------------------------------------|--------------------------------------------------------------------------------|--------------------------------------------------------|----------------|
| Package A - Internal Infrastructure Test (Managed)            | Internal network / cloud infrastructure testing managed end-to-end             | Up to 25 internal targets (IP addresses)               | £1,500         |
| Package B - External Infrastructure Test (Managed)            | External perimeter / internet-facing infrastructure testing managed end-to-end | Up to 5 external targets (IP addresses)                | £750           |
| Package C - Internal + External Infrastructure Test (Managed) | Combined internal and external infrastructure testing managed end-to-end       | Up to 25 internal targets and up to 5 external targets | £2,000         |

## 2. What is included in each package

### Package A - Internal Infrastructure Test (Managed)

- Engagement scoping and Rules of Engagement (RoE) confirmation
- Test coordination, access management and scheduling
- Internal testing of up to 25 internal targets (IP addresses)
- Findings triage and risk-rated remediation plan
- Assurance pack including final report and evidence (Renaissance-branded unless CREST is required)
- One remediation validation / retest within the agreed window

### Package B - External Infrastructure Test (Managed)

- Engagement scoping and Rules of Engagement (RoE) confirmation
- External testing of up to 5 external targets (IP addresses)
- Findings triage and risk-rated remediation plan
- Assurance pack including final report and evidence (Renaissance-branded unless CREST is required)
- One remediation validation / retest within the agreed window

### Package C - Internal + External Infrastructure Test (Managed)

- Engagement scoping and Rules of Engagement (RoE) confirmation
- Internal testing of up to 25 internal targets (IP addresses)
- External testing of up to 5 external targets (IP addresses)
- Findings triage and risk-rated remediation plan
- Assurance pack including final report and evidence (Renaissance-branded unless CREST is required)
- One remediation validation / retest within the agreed window

## 3. Additional targets (same engagement)

Additional targets must be in-scope and authorised. Pricing is for additional infrastructure targets within the same engagement and reporting period.

| Item                        | Unit                               | Price (ex VAT) |
|-----------------------------|------------------------------------|----------------|
| Additional internal targets | Blocks of 25 internal IP addresses | £595           |
| Additional external targets | Blocks of 5 external IP addresses  | £245           |

## 4. Optional remediation support

If the Buyer requires hands-on remediation support (hardening, configuration changes, and fix validation), this can be provided as an optional service.

**Rate:** £600 (per day - 7.5 hours)

## 5. Assumptions and exclusions

### Assumptions

- Buyer provides written authorisation and agrees the scope and Rules of Engagement (RoE) before testing begins.
- Buyer provides a technical point of contact and (where required) test accounts, allow-listing, and relevant documentation.
- Testing windows may be required for production systems to minimise operational risk.

### Exclusions (unless separately agreed and quoted)

- Out-of-scope targets and any unauthorised testing activity.
- Social engineering, phishing, and physical security testing.
- Denial-of-service (DoS) testing on production systems.
- Application penetration testing beyond infrastructure targets (unless explicitly included in scope).

### VAT

All prices are exclusive of VAT. VAT will be charged at the prevailing rate where applicable.
