# 1. XAIS-PTS Overview

XAIS-PTS offer a range of services and software to Local authorities, highway network operators and international transport organisations looking to get best value from their highway asset management data and plans. Many of our road condition monitoring data collection services are newly **PAS2161** accredited and allow us to provide innovative, compliant and wholistic delivery.

With over 150 inhouse resources we take pride in high-quality, right-first-time delivery and aim to build long-term relationships with our clients based upon mutual trust and commitment. We have a dedicated, agile team who can respond quickly to your needs through a flexible and personalised service. Our experienced team allows users to achieve better value in their asset management practices.

In a sector that has under unprecedented pressure to do more with less it is our mission to help local authorities, highway network operators and transport organisations manage assets more effectively and efficiently.

Spearheaded by our cutting-edge technology team and unique software we deliver an array of intelligent, high quality, practical and cost-effective solutions that can be tailored to maximise long-term value and sustainability of all assets.

We have a team of asset management, experts in all major infrastructure groups, to assist in the management and data collection of information to inform programmes and Whole Life Plans. Through continuously listening to our clients through forums, our annual open days, attending DfT working groups and support feedback we ensure our clients are at the forefront of best practice and innovation.

Our goal is to ensure that we deliver a cost-effective solution to our clients and ensure that only appropriate and useful information/date is collected to support decisions. Local Authorities are constantly under pressure not just to meet public expectations but also to manage budgets and ensure efficient use of resources and maintain ageing assets, at XAIS-PTS we can proactively support in meeting this demand.
