

ENTERPRISE KNOWLEDGE

Service Pricing

Service Costs

Pricing for Enterprise Knowledge services is based on the Government Digital and Data Profession Capability Framework rate card submitted as part of the G-Cloud pricing section. This rate card sets out the maximum daily rates for each role offered.

Services may be delivered on a time-and-materials basis or, where appropriate, on a fixed-price (outcomes-based) basis. Fixed pricing is derived directly from the applicable day rates and the agreed scope of work. All pricing is confirmed with the client prior to commencement, following scope validation, and will not exceed the published day rates.

Travel Costs

Travel and subsistence costs, where required, are not included by default and will be charged to the Buyer at cost. Any travel requirements will be discussed and agreed in advance with the Buyer and confirmed as part of the engagement scope.
