

Pricing Document

G Cloud 15

Full pricing is set out in the Pricing section for Lot 3 – Cloud Support of the G Cloud 15 framework, as required. This lists maximum day rates for a range of roles, across various Job Families.

With Cinergy Services extensive experience in delivering a range of consultancy services to the NHS and other health and care organisations over many years, to clarify our general day rates, we've added some more detail here.

For some of our main services, such as business case creation and benefits realisation mapping and delivery, our regular day rate is £850 per day + VAT.

For longer engagements, it may be that a discount on this day rate can be offered.

All day rates for all work, are subject to discussion and agreement and, via G Cloud 15, compatible with the pricing set out in the Pricing section of Lot 3, and the Framework and Call-Off agreements.

1. All rates are negotiable depending on the specific characteristics of the assignment, the nature of the organisation and the expense involved in delivering (e.g.: at home v on-site, travel, hotels, software or hardware requirements, etc).
2. All prices are PLUS VAT (at the prevailing rate, which was 20% at the time of writing, but may change over time).
3. Pricing for packages of work, discounts for volume of days purchased, etc can apply.
4. There is no offshore rate versus onshore, this price is the same. No work is currently done offshore; all our work is done in the UK.
5. Expenses rules comply with those required by the G Cloud 15 framework.
6. Other discounts are offered at discretion, based on some of the factors above.
7. All prices commented above, will comply with those prices listed in the G Cloud pricing section, as entered in the portal.
