Mi-Justice Discovery & Design Service

Service: Mi-Justice Discovery & Design Service

Framework: G-Cloud 15

Valid from: 30 January 2026 | Expiry: End of G-Cloud 15 Framework

1 Pricing Model Cloud Service

This service is priced on a **time-and-materials** basis using published day rates for clearly defined roles (for example: Discovery Lead, Cloud Architect, Business Analyst, User Researcher, Service Designer, Delivery Manager). Pricing aligns with G-Cloud 15 Lot 3, where cloud support services are typically bought either outcomes-based or time-and-materials. For call-offs awarded without further competition, our day rates do not exceed the framework maximum Government Digital and Data Profession Capability Framework day rates referenced for Lot 3.

Day rates are exclusive of VAT and are applied pro-rata for partial days where agreed. Rates cover labour, standard tooling, and normal overheads; any travel and subsistence are charged in line with the buyer's policy or at cost where permitted, and only when pre-approved in the call-off contract. Better value for money can typically be achieved through further competition and/or larger pre-planned work packages, in line with CCS guidance that Lot 3 buyers may run outcome-based or time-and-materials mini-competitions

2 Rate Card & Assumptions

A role-based rate card is provided in the Lot 3 pricing sheet, setting out the standard day rate for each delivery role within the service (for example: Discovery Lead £X/day, Cloud Architect £Y/day, Business Analyst £Z/day, ex VAT). Where the buyer has a defined budget or outcome, we can propose an indicative mix of roles and days to remain within that budget while still using the time-and-materials mechanism described for Lot 3 Cloud Support

Unless otherwise agreed, a "day" assumes 8 hours of work during UK business hours, Monday to Friday, excluding public holidays. Any volume discounts, capped-time arrangements, or fixed-price work packages for tightly scoped discovery or design phases will be clearly documented in the call-off, but will still be underpinned by the same transparent role-based day rates.
