

G-Cloud 15 Starlight AI Platform Service Definition

Sovereign AI for Public Services

Starlight is building Britain's Sovereign AI capability with an intelligent orchestration layer between your frontline services and fragmented legacy systems, automating all administrative work and dramatically improving outcomes for everyone in Britain.

One interaction. Total orchestration.

01

Service Layer

Teams focus on decisions and delivery, while Starlight orchestrates the work.

03

Data & Systems Layer

Unifies existing systems and improves data quality

02

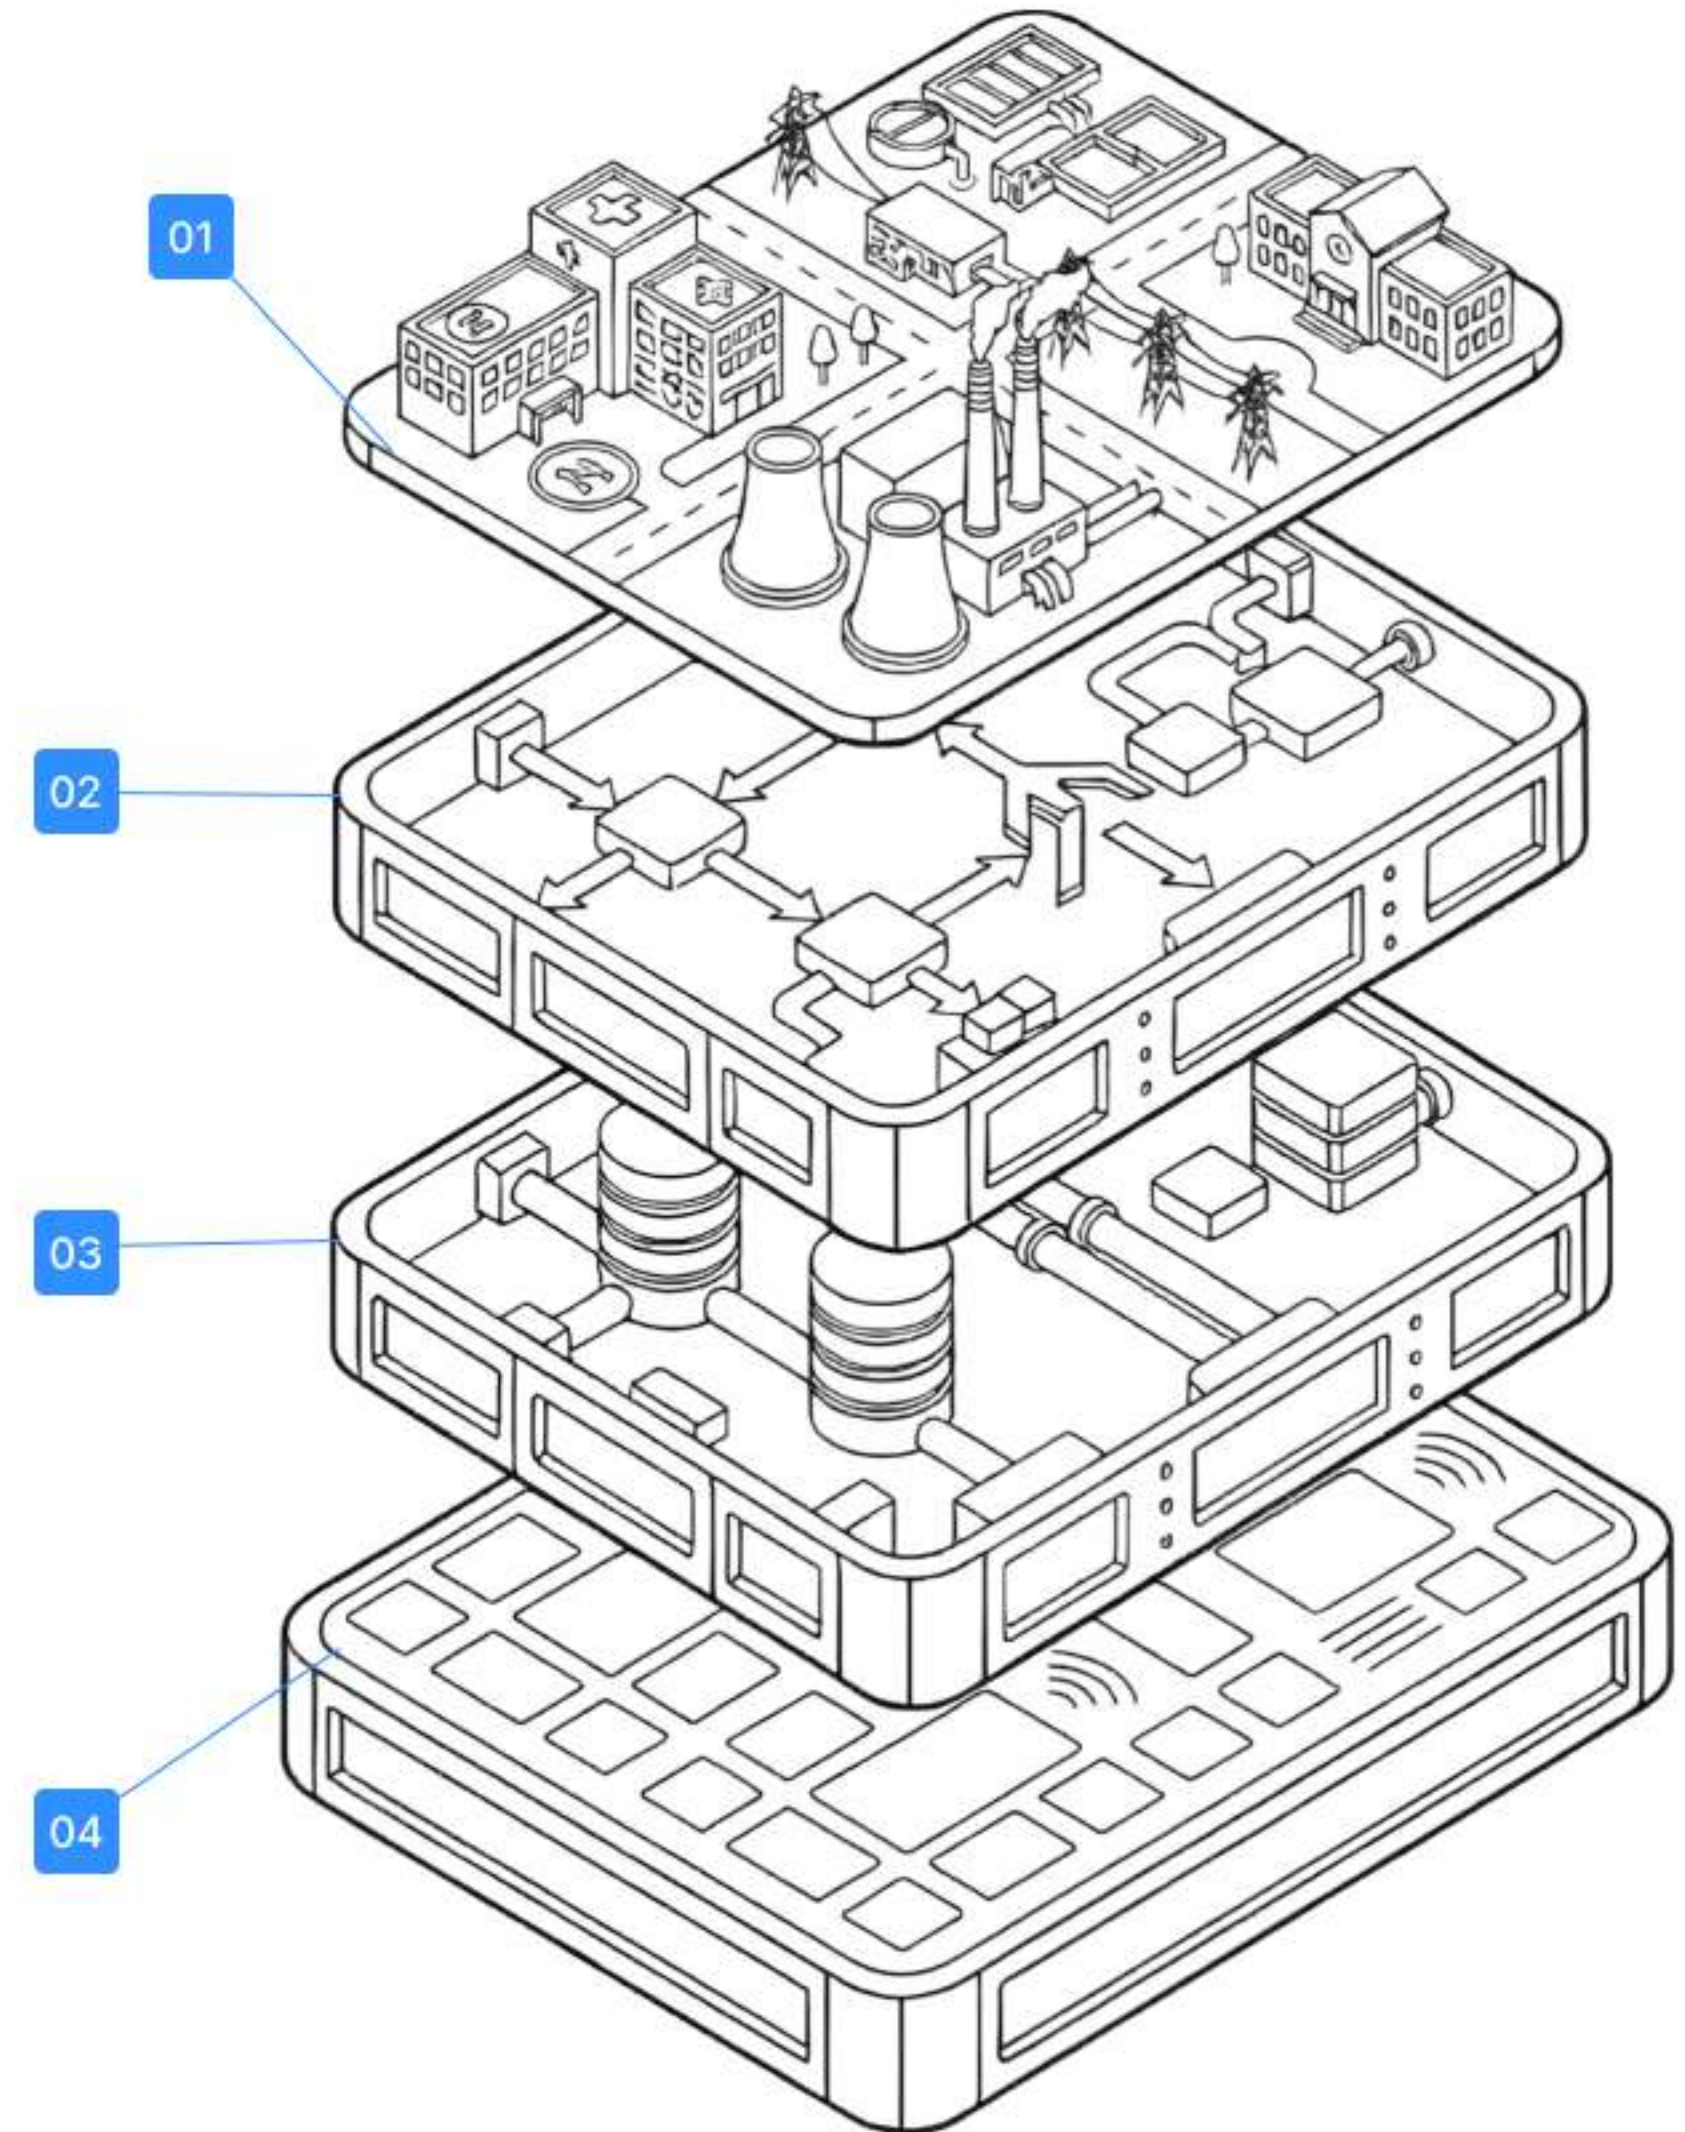

AI Orchestration Layer

Routes requests, executes workflows, and escalates when needed.

04

Predictive Intelligence Layer

Anticipates demand, risks, and outcomes.

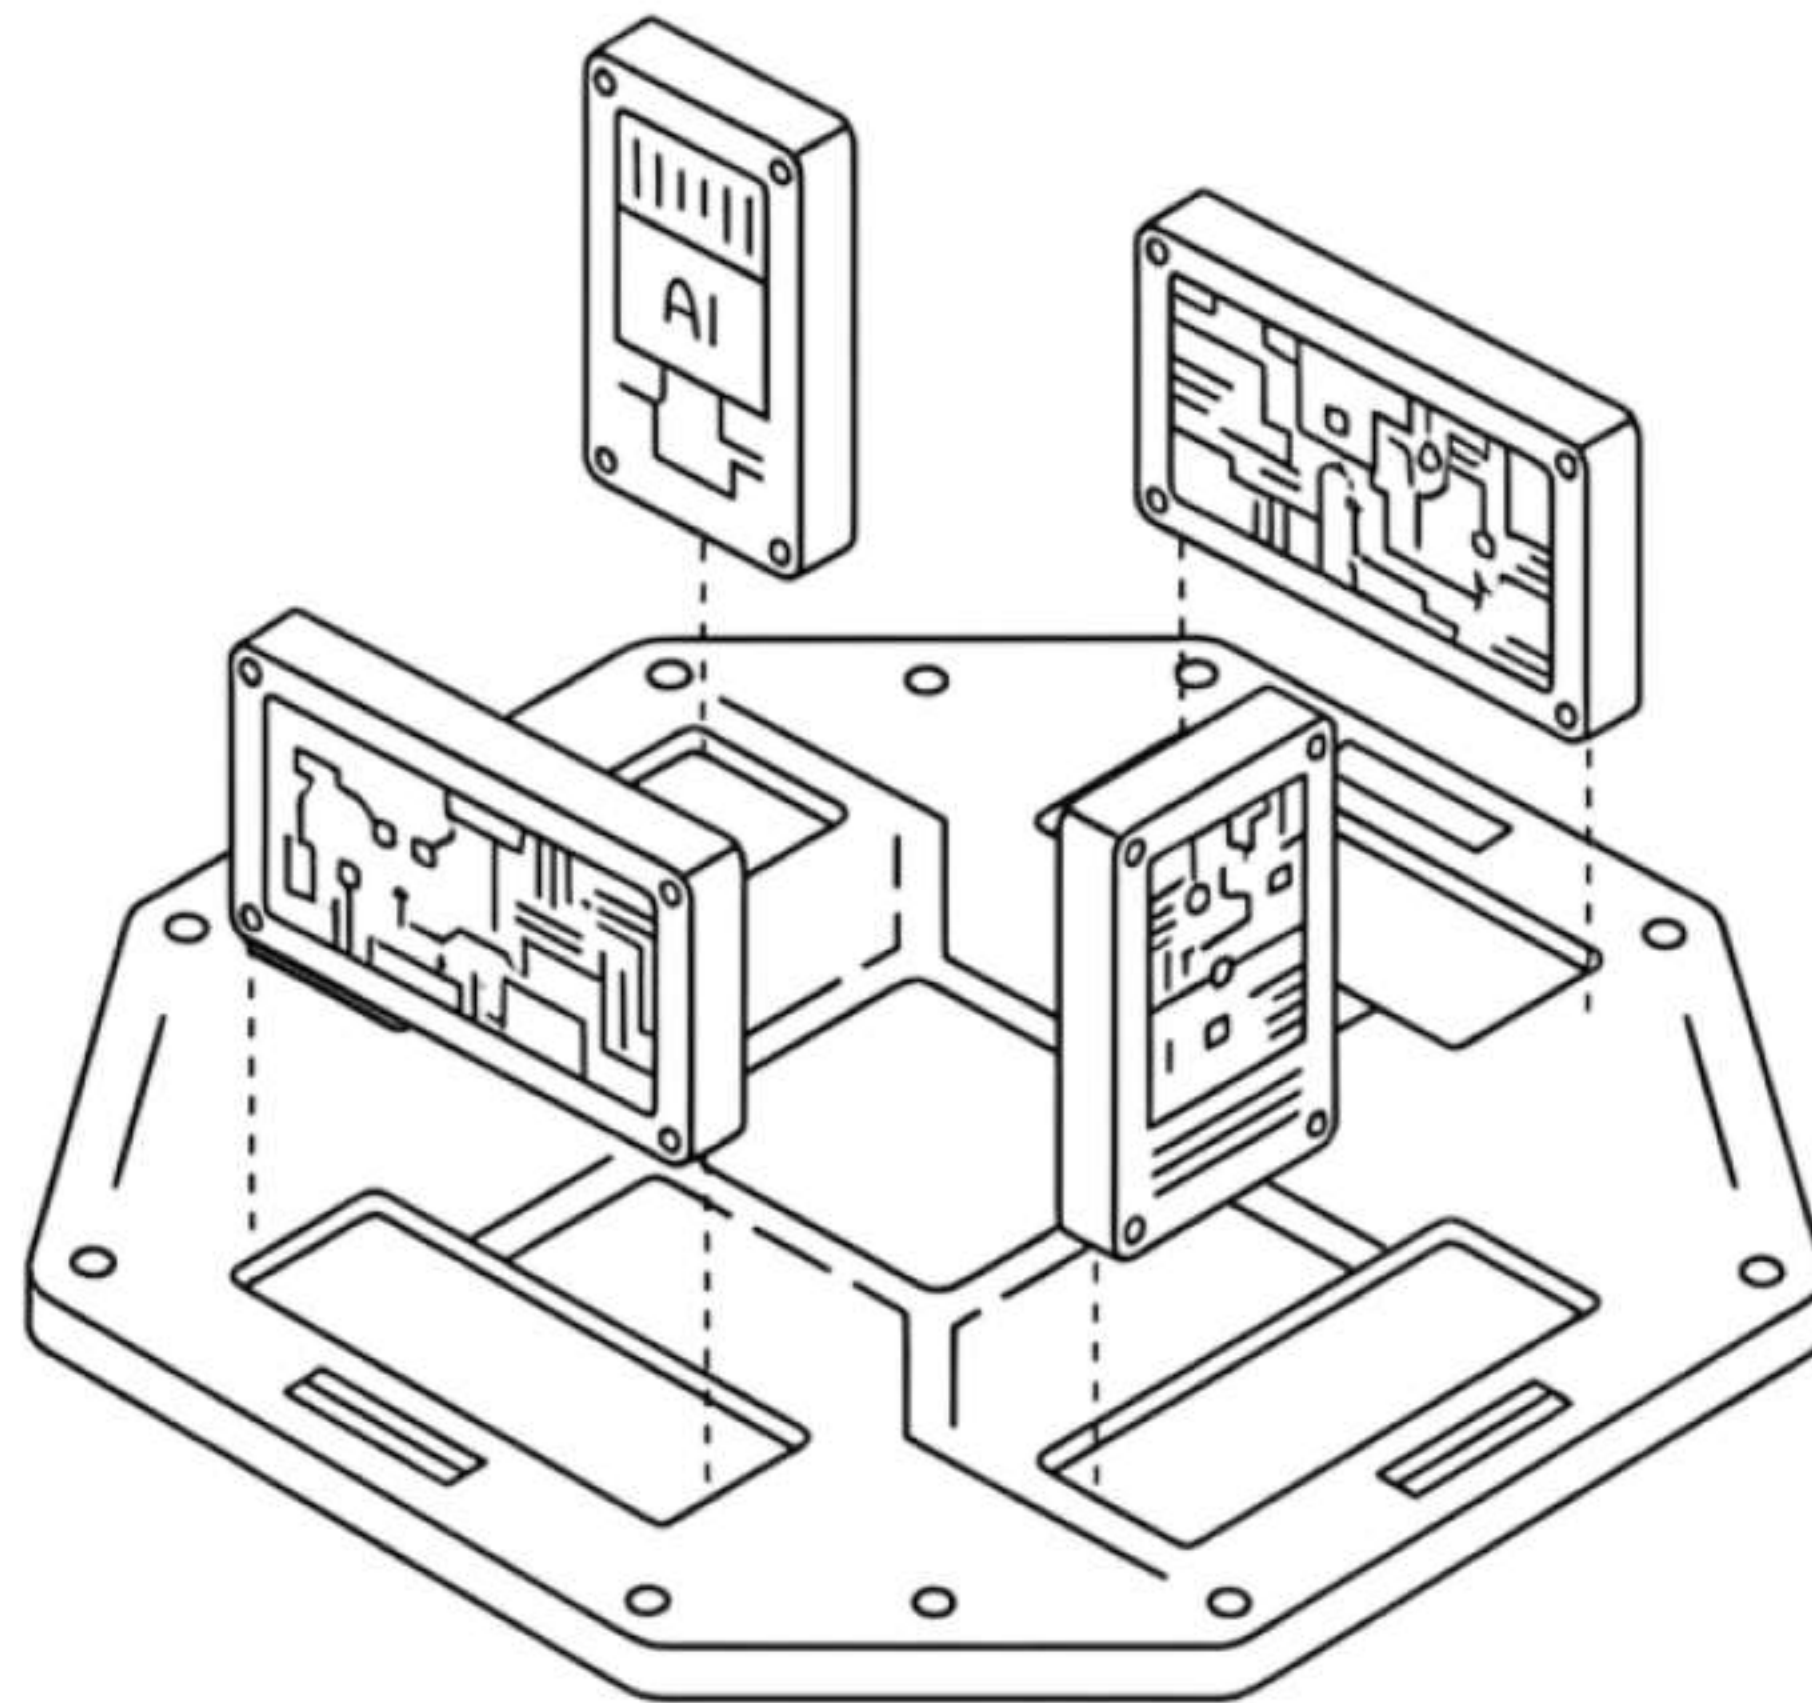

★ CORE TECHNOLOGY

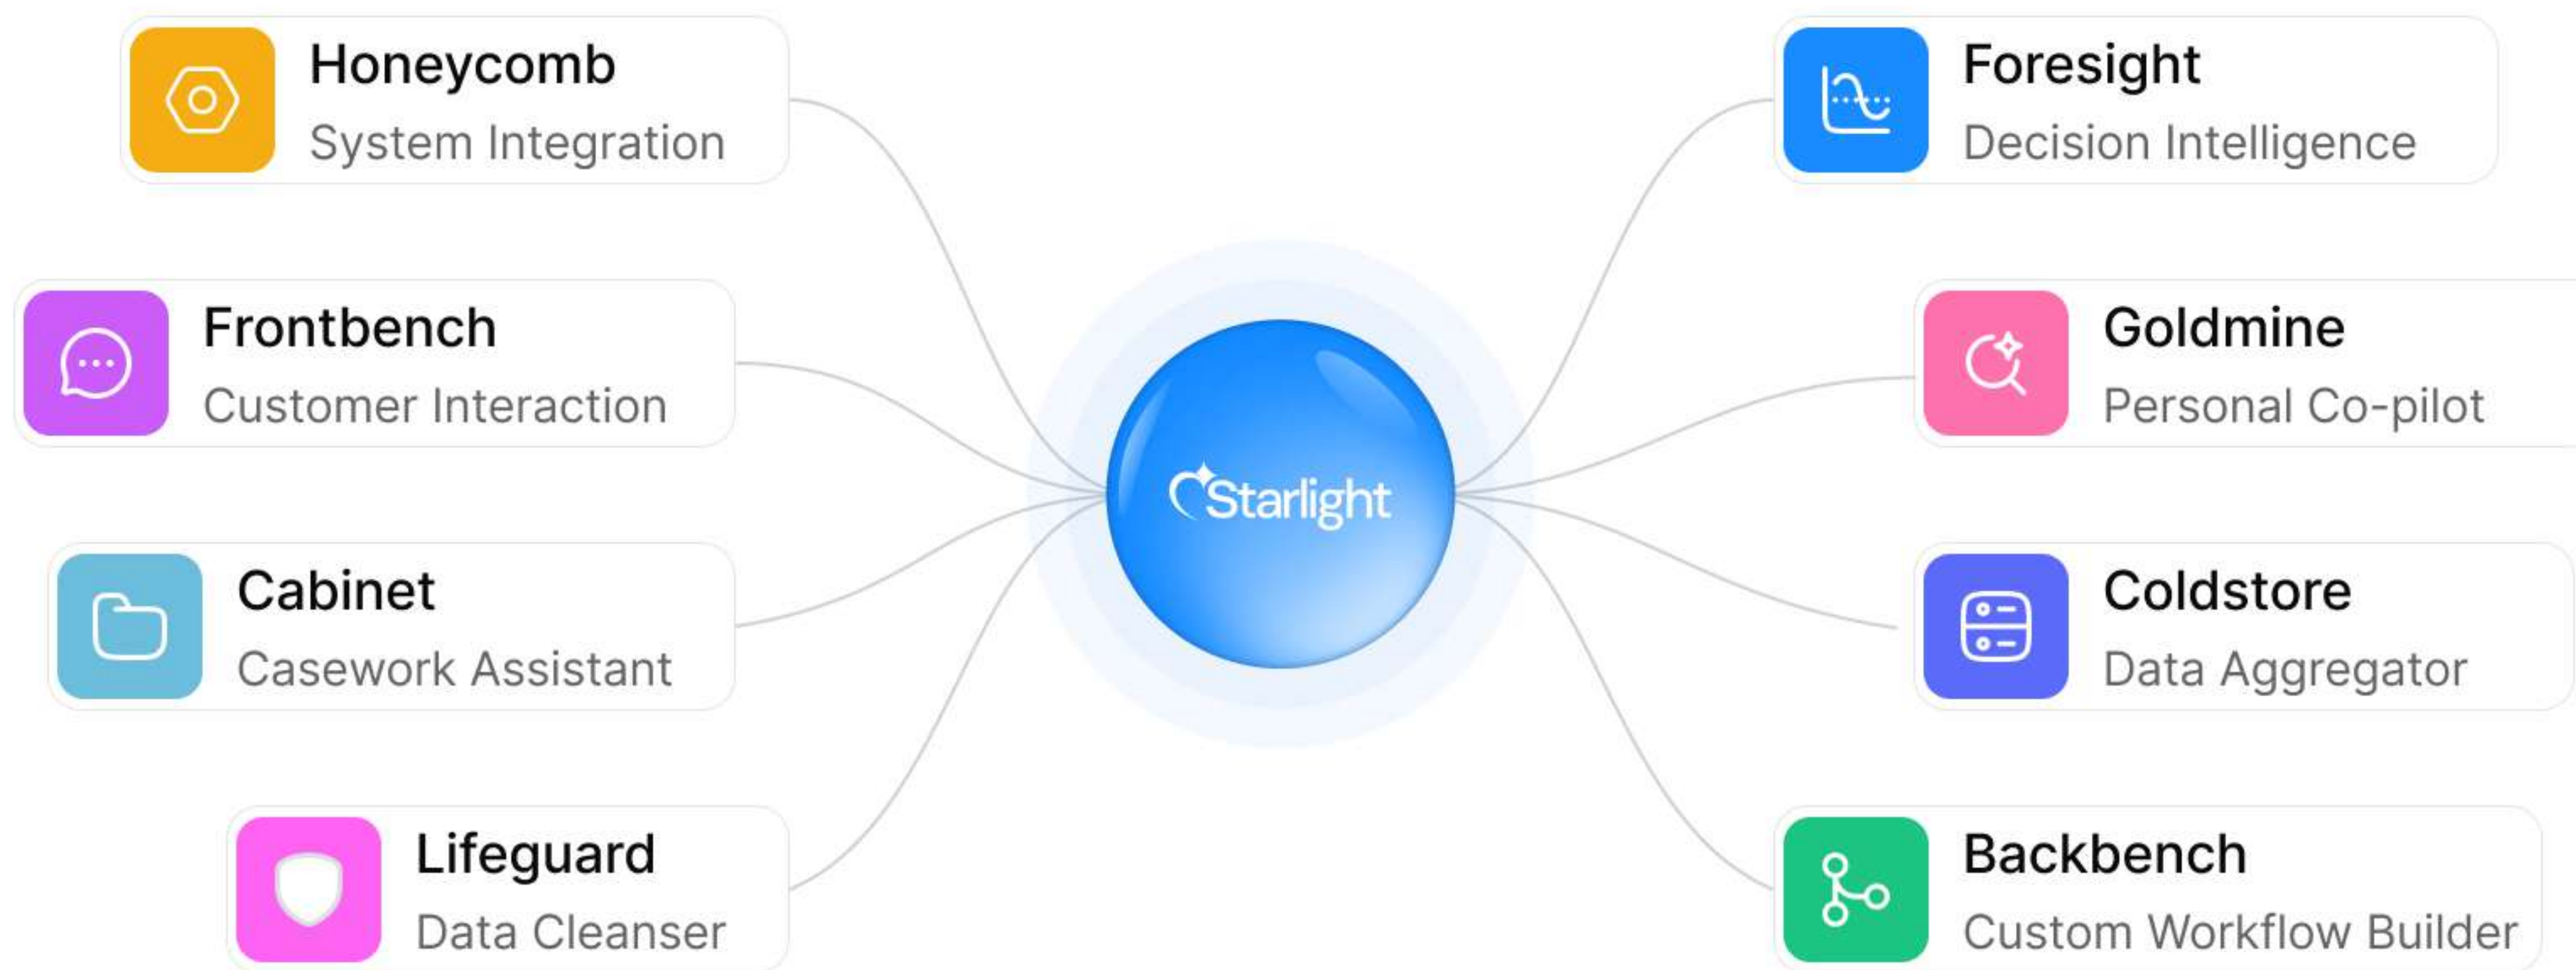

From Architecture to Capability

Each layer is powered by a set of AI capabilities.

These capabilities are delivered through modular AI platforms, each designed to solve a specific operational problem, but built to work together as one system.

These are the engines inside the layers

Starlight's G-Cloud 15 Offerings

-  Starlight AI: Sovereign AI for Public Services (Lot 2b)
-  Frontbench: Sovereign AI for rapid system integration (Lot 2b)
-  Honeycomb: Sovereign AI for rapid system integration (Lot 2b)
-  Agentic AI Process Automation: Integrate Any System (Lot 1a)
-  Cabinet: Sovereign AI for admin-free casework (Lot 2b)
-  Lifeguard: Sovereign AI for data cleansing & quality improvement (Lot 2b)
-  Foresight: Sovereign AI for decision intelligence, simulation & predictive modelling (Lot 2b)
-  Goldmine: Sovereign AI for secure knowledge retrieval, research & policy drafting (Lot 2b)
-  Coldstore: Sovereign AI for admin-free case & database management (Lot 2b)
-  Backbench: Sovereign AI for system-agnostic custom workflow builder (Lot 2b)

Transform your frontline

Ready to let AI handle the admin so your team can focus on what matters most?
