

Intelligent Assessments Platform - Pricing (G-Cloud)

1. Overview

This document sets out the standard pricing for the Intelligent Assessments Platform when procured through the UK Government G-Cloud framework. Pricing is offered on a transparent subscription basis and should be read alongside the Digital Marketplace service listing and the applicable G-Cloud Call-Off Contract.

Where there is any conflict, the Digital Marketplace listing and Call-Off Contract take precedence.

All prices are exclusive of VAT unless stated otherwise.

2. Core SaaS subscription pricing

The Intelligent Assessments Platform is provided as a cloud-hosted SaaS subscription. Subscriptions include platform access, hosting, standard support during UK business hours, platform updates, and access to standard assessment templates.

Subscription tier	Maximum users	Included capabilities	Price	Billing period
Expert	Up to 10	Core assessment platform, dashboards, reporting	£220	Per month
Additional user bundle	Additional 10 users	Additional user access within the same organisation	£175	Per month
Insights	Up to 150	Core platform plus Insights Hub and advanced analytics	£1,250	Per month
Unlimited (Medium)	Up to 300	Platform, Insights Hub, expanded analytics capacity	£1,950	Per month
Unlimited (Large)	Up to 500	Platform, Insights Hub, advanced analytics	£2,450	Per month

Additional user bundles may be purchased to extend access beyond the base subscription. Where usage increases materially, buyers may choose to move to a higher subscription tier that provides better value at scale.

Pricing is fixed for the duration of the Call-Off Contract.

3. Onboarding and enablement

Supplier-led onboarding is required where a department or organisational unit requires assistance with initial configuration, organisational structure, access controls or dashboards.

Where an organisation has already been onboarded and is able to self-serve additional departments using existing configuration, additional onboarding may not be required. Where supplier-led onboarding or dashboard setup is required, this will be charged as a one-off fee.

Service	Description	Price
Onboarding and enablement	Supplier-led setup of organisational structure, user access, permissions and one initial dashboard, including orientation to platform features and configuration. Required where supplier-led assistance is needed.	£3,000
Additional dashboard configuration	Supplier-led setup of an additional dashboard or reporting view, including configuration of metrics, filters and visual layouts aligned to buyer requirements.	£1,000
Assessment configuration and template setup (quoted)	Fixed-price, outcome-based assessment setup scoped in advance	Quoted

4. Assessment and content bundles (optional)

Buyers may optionally licence pre-configured assessment and survey content bundles. These are provided on an annual basis and may be used across the organisation.

The bundles are designed to support common assurance, capability, compliance and governance use cases. Templates within each bundle are configurable and can be adapted to align with organisational frameworks, standards and policies as required.

The bundles are not intended to represent formal certification or compliance assessments unless explicitly agreed.

Bundle	Description	Annual price
Delivery Assurance Bundle	Programme and project assurance assessments	£995
Organisational Capability Bundle	Capability and maturity assessments	£495
ESG and Compliance Bundle	ESG, compliance and regulatory assessments	£495

Digital, Data and Technology Bundle	Digital, data, cloud and AI assessments	£495
Full Assessment Library	All available standard assessment bundles	£1,495

5. What is included

All subscriptions include:

- Access to the Intelligent Assessments Platform
- Secure cloud hosting and infrastructure
- Standard support during UK business hours
- Platform maintenance, updates and enhancements
- Access to standard templates

6. Discounts and trials

The service does not include a free trial as standard and does not offer specific educational discounts under the G-Cloud framework.

7. Billing and payment

Billing frequency and payment terms are defined in the G-Cloud Call-Off Contract. Charges are payable in advance unless otherwise agreed in writing.

8. Changes to pricing

Pricing remains fixed for the duration of the Call-Off Contract. Changes to catalogue pricing will not affect existing contracts.

9. Contact

For pricing clarification or to request a quotation in line with the Digital Marketplace listing, buyers should contact the supplier using the details provided in the service listing.
