Defining Excellence in Cloud Consultancy

With a 25+ years track record of success, working for clients such as the *Home Office*, Info-Power Ltd provides elite cloud support and consultancy services, enabling organisations to navigate digital transformation with confidence. We move beyond simple staffing to provide a holistic, quality-assured partnership. Our principal consultants bring over two decades of experience delivering critical infrastructure updates within major UK Government departments and Tier-1 Enterprise environments.

Flexible Delivery Models

We are structured to support a range of engagement models, including on-site, remote, and hybrid working, aligned to client needs and project requirements.

Methodology-Aligned Delivery

Our approach is designed to integrate seamlessly with established delivery frameworks such as SAFe, Scrum, Kanban, and PRINCE2, adapting to existing governance and team practices.

Modern DevOps Mindset

We promote a DevOps-first way of working, focusing on automation, reliability, and continuous improvement throughout the delivery lifecycle.

Continuous Integration

Delivery pipelines are designed to support automated builds, testing, and deployments, enabling faster feedback cycles and reduced operational risk.

Infrastructure as Code

Cloud environments are provisioned using infrastructure-as-code principles, enabling consistent, repeatable, and auditable deployments.

Observability & Monitoring

Solutions are architected with end-to-end visibility in mind, supporting metrics, logging, and monitoring to improve performance and operational insight.

Security by Design

Security considerations are embedded from the outset, with an emphasis on automated controls, compliance alignment, and risk reduction.

Transform Your IT Capability—Risk-Free

When you partner with Info-Power, you're not just buying consultant time—you're investing in **measurable business outcomes**. Our pricing is competitive, but it's our **unique value proposition** that sets us apart.

Accelerated Delivery

Designed to reduce time-to-production by applying proven delivery patterns and domain-aware engineering practices.

Low Ramp-Up Overhead

Engagements are structured to minimise onboarding time and enable teams to contribute quickly and effectively.

Secure & Compliant Delivery

Compliance and governance considerations are built into how we plan, deliver, and operate services. Cyber Essentials certified.

Premium Support Tier

Every engagement includes **Standard Support** (Mon-Fri, 09:00-17:30, 4hr SLA). Need 24/7 coverage? Upgrade to **Premium Support** with 1-hour critical incident response and dedicated hotline access.

Educational Discount

Info-Power is committed to supporting the digital growth of the UK education sector. We offer a preferential **5% educational discount** on our standard SFIA day rates for qualifying institutions, such as: Primary and Secondary Schools, Universities and Higher Education Providers, Research Councils

★ The Info-Power Quality Guarantee

Before any consultant is deployed to your organisation, we rigorously verify they possess the capabilities required for your specific engagement. In our recommended model, consultants work from **Info-Power's office during their first month**, allowing us to closely monitor their working style, communication skills, and technical alignment with your project requirements. Once proven, they transition to work from your client site or remotely as needed. If a consultant doesn't meet your expectations, **we replace them at no additional cost**—ensuring you only work with professionals who are productive, aligned, and proven.
