

KnowBe4 - The #1 trusted Security Awareness platform

Could your employees spot a phishing email?
Maybe. But how confident are you that they wouldn't click that link?

KnowBe4 is a leading security awareness training and phishing simulation platform that helps organisations reduce human error, the #1 cause of cyber incidents. Through engaging education and realistic simulations, KnowBe4 turns your workforce into a proactive line of defence against cyber threats.

Why doesn't security training usually work?

Traditional training is dry, forgettable, and disconnected from real threats. Employees tune out, leaving organisations vulnerable to phishing and social engineering.

Security errors KnowBe4 helps you fix

- Human error in cybersecurity → Training and simulations reduce risky behaviour.
- Phishing susceptibility → Realistic simulations teach users to identify and avoid threats.
- Compliance complexity → Built-in policy management and reporting support GDPR, HIPAA, SOC 2 and more.
- Lack of visibility → Dashboards and analytics provide clear insight into user risk and progress.
- Low engagement with training → Gamified, automated modules keep users involved and learning.

How KnowBe4 prevents social engineering

- Reduces human risk by building awareness and safe habits.
- Strengthens security culture across departments and roles.
- Delivers data-driven insights with user risk scoring and performance metrics.
- Scales easily for SMBs and global enterprises.
- Integrates seamlessly with Active Directory, SSO, and major email platforms.
- Supports compliance with policy tracking, audit logs, and training records.

Who is this for?

- All organisations need to have a cyber-aware workforce, no matter their size or industry. KnowBe4 will help you build that security culture.

What our service provides

- Security Awareness Training- World's largest library of security awareness training content.
- Interactive, customisable modules with videos, quizzes, and real-world examples.
- Realistic, automated phishing tests with instant feedback which reflect current attack trends.
- Intuitive analytics and user risk scoring.
- Dashboards track user performance, risk levels, and "Phish-Prone Percentage" to measure progress.
- Policy & Compliance Management
- Distribute policies, track acknowledgements, and generate audit-ready documentation.
- A curriculum of training chosen for you based on your organisation's needs or risk profile - or you can build it yourself.
