

SecureScan - Penetration Testing that's Continuous and Compliance-Ready

If you're only pen testing once a year to tick a box, you're leaving gaps.

SecureScan is Trustack's Penetration Testing as a Service (PTaaS) solution, designed to give you continuous visibility into your security posture. It combines automated scanning with expert-led testing to uncover vulnerabilities before attackers do, with real-time reporting and actionable remediation guidance.

Why traditional pen testing isn't enough anymore

Annual penetration tests give you a snapshot in time, but threats evolve daily. Long lead times, static reports, and limited visibility give attackers the upper hand from the outset.

What SecureScan helps you fix

- Blind spots in your network → Simulates real-world attacks to uncover internal and external vulnerabilities
- Slow, outdated testing cycles → Flexible scheduling and real-time results reduce delays
- Compliance pressure → Supports frameworks like Cyber Essentials, ISO27001, and cyber insurance requirements
- Lack of remediation clarity → Reports include clear exploit paths and step-by-step fixes
- Limited internal resources → Delivered by certified penetration testers with minimal disruption

How SecureScan strengthens your security posture

- 24/7 Protection - Continuous monitoring ensures you're always ahead of potential threats.
- Real-Time Insights - A dashboard shows your security status in real-time. It promptly notifies you of any issues.
- Expert Support on Demand - Cybersecurity experts are available to help you when you need advice or a solution.
- Scalable for Growth - As your enterprise expands, PTaaS scales alongside you. It keeps your new systems, networks, and employees safe.
- Cost-Effective: PTaaS offers expert protection without the high costs of a full-time in-house team.

What we provide you with this service

- Internal and/or external network penetration testing
- Real-time visibility into vulnerabilities and risk levels
- Executive summary and full technical report
- Exploit path mapping and remediation guidance
- Biannual testing with flexible scheduling and rapid delivery
- Two subsequent retests
- Ongoing access to Trustack's security experts
- Support for compliance, insurance, and audit readiness

Want to know more?

We'd be happy to show you how SecureScan can help you uncover hidden risks and strengthen your defences, before attackers do.
