F8 Networks – Service Definition

AWS Cloud Migration, Security & Managed Services

Service Overview

F8 Networks provides secure, compliant Amazon Web Services (AWS) cloud services covering architecture, migration, landing zones, governance, security, identity, and ongoing operations. The service enables public sector organisations to adopt, secure, and operate AWS using AWS native security services, DevSecOps, and best practices aligned with UK government standards.

G-Cloud Lot: Lot 3 – Cloud Support

Service Categories

Set Up and Migration; Security Services; Managed Cloud; Ongoing Support.

Key Features

- AWS cloud architecture and migration planning
- Secure landing zone and Control Tower setup
- AWS Security Hub, GuardDuty, and Inspector
- CloudTrail and CloudWatch monitoring
- Secure IAM and identity federation
- Backup, resilience, and disaster recovery design
- AWS infrastructure management and optimisation
- AWS Well-Architected security reviews
- CSPM and CWPP security integration
- Secure DevSecOps pipeline implementation
- Multi-account security governance

Benefits

- Faster and safer AWS adoption
- Reduced security and compliance risk
- Improved resilience of public services
- Strong multi-account governance
- Clear auditability and assurance

Service Constraints

The service is primarily delivered remotely. Onboarding timescales depend on AWS account structure, estate size, and security requirements. Some features require AWS native services to be enabled. Onsite and out-of-hours support is available by agreement.

Support Levels

Standard (business-hours support), Enhanced (priority support with named AWS engineer), and Premium (24×7 support with Technical Account Manager). Support is provided as a fixed monthly service based on scope and criticality.
