

RedTail CyberArk Managed Service

Pricing for the Managed Service is dependent on specific conditions and requirements of the customer, including:

- The number of CyberArk modules in scope
- The size of the privileged account and user population
- The number of managed platforms and connectors
- The overall environmental and operational complexity

These factors are assessed and confirmed as part of the onboarding and discovery process.

Pricing in GBP

Product Name	SKU	Pricing Meter	Annual Price: 3 Year	Annual Price: 1 Year	Description	Minimum Quantity
