Immersive VR Training

Accredited healthcare education that saves time, money, and improves outcomes. Revolutionising healthcare and education with immersive VR training experiences that engage, inspire, and deliver measurable impact.

Service Features

- Tailored solutions aligned with organisational needs
- Seamless integration into existing processes
- Collaboration to map decision points and scripts to ensure every module has measurable impact
- Focus on interaction for immersive experiences
- 360 location filming with clients, actors and specialists
- Authentic high-quality material for integration
- Regular reviews by subject matter experts to refine accuracy, pacing, and UX.
- Post-launch, analytics dashboards and debriefs track outcomes.

Service Benefits

- Expert led solutions for immersive experiences
- Modules are packaged and launched to VR headsets or secure web players
- Configured for kiosk mode, device management, and fleet deployment.
- Interactivity, branching, scoring, and accessibility are built in.
- Logistics, casting, and continuity managed end-to-end
- Data driven results to address specific challenges
- High-quality comprehensive VR solutions
- Enhanced learner engagement and emotional connection

Why choose VR Training?

FASTER LEARNING Accelerated skill development through immersive, hands-on training experiences	COST EFFECTIVE AT SCALE Reduce training costs while scaling education across large healthcare organisations	MEASURABLE OUTCOMES Track progress with detailed analytics and evidence-based performance metrics
FLEXIBLE TRAINING Learn anytime, anywhere with on-demand access to comprehensive training modules	RISK FREE PRACTICE Practice complex procedures and challenging scenarios without any risk to real patients	ENHANCED RETENTION Superior knowledge retention through experiential learning and emotional engagement

www.revivelabs.co.uk

Impact & Evidence

4 x FASTER Average time-to-complete vs classroom. 1.5 x v 3-learning	3.75 x MORE ENGAGED Stronger emotional connection vs classroom learners
275% MORE CONFIDENT Greater confidence to apply learning after training	64% SAVINGS AT SCALE Lower cost per learner as cohorts grow (VR reusability & shorter seat time)

"The team at Revolve Labs combine educational expertise with cutting-edge technology, making them a trusted partner for delivering high-quality VR learning experiences for clinicians and trainees." <i>Prof. Karl Gaffney – Professor of Rheumatology & Director, Rheumatology Events</i>	"With the launch of the EAES Colorectal Curriculum, we are redefining how science and knowledge are communicated. Thanks to the Revolve Labs team, it's been amazing working in this spectacular studio." <i>Prof. Alberto Arezzo – Professor of Surgery, University of Turin & General Secretary of the European Association of Endoscopic Surgery</i>	"Fantastic experience collaborating with Revolve Labs – transformed my approach to future presenting and really excited to further evolve the presentation of surgical education." <i>Ken Campbell – Dundee Institute for Healthcare Simulation</i>

About Revolve Labs

Revolve Labs provides an end-to-end immersive learning design service for healthcare organisations, focusing on high-quality virtual reality training. Our team combines educational expertise with advanced digital production to create impactful, accessible learning experiences that improve clinical confidence and patient outcomes.

Our service includes early-stage consultancy to shape learning strategy and technical approach, followed by full content production using 360-degree video, computer-generated environments, traditional videography, and 3D animation. We then deploy the training through Meta Quest headsets or web-based platforms, ensuring seamless delivery across clinical settings.

All learning experiences are built using real patient journeys, specialist clinical insight, and interactive components such as branching scenarios, hotspots and reflective learning prompts. After deployment, we support organisations with evaluation, refinement and scaling to help embed learning and demonstrate impact.

Revolve Labs has delivered VR training for NHS partners and medical device companies, creating solutions that support workforce development, clinical education and recruitment. Our managed-service model can include headset leasing, distribution and technical support, enabling organisations to adopt immersive learning without operational burden.

Website - <https://www.revovelabs.co.uk>

Service delivery - UK and remote

Primary sectors - Healthcare, education and professional training

Organisation type - Small and medium sized enterprise

www.revovelabs.co.uk

Our Approach - All VR training is developed collaboratively with client stakeholders and subject matter experts to ensure clinical accuracy, relevance to real world practice and measurable learning outcomes. Content is reviewed and refined throughout development and post launch to optimise learner experience, usability and impact.
