

G-Cloud Services

About Us

Lookthru is a UK-based business intelligence consultancy that helps clients to transform their raw data into actionable insights, optimising business processes and leverage automated workflows.

Why Us?

Clients across the globe are recognising the value that Lookthru delivers. By choosing Lookthru, they benefit from a level of service that consistently exceeds expectations. Through close collaboration with our team, we build trusted, long-term partnerships and ensure a positive, rewarding experience at every stage of the journey.

Our Values

We believe clarity builds confidence. We cut through complexity to provide clear insights, honest guidance and straightforward solutions that our customers can trust.

From communication to delivery, we are clear, honest and accountable, ensuring customers always understand the “why” behind our recommendations.

We work with our customers, not just for them. By collaborating closely and listening carefully, we build long-term relationships based on mutual trust and shared goals.

We deliver consistently high standards, meet commitments and provide solutions that perform as expected.

Our solutions are guided by insight, data and experience. We empower customers with intelligent analysis that supports informed, confident decisions.

Lookthru is driven by a clear set of values that guide how we work with our clients.

Our Mission

To provide clarity through insight—empowering our clients with transparent, intelligent solutions that drive confident decision-making and long-term success.

We achieve this by combining industry expertise with a collaborative, client-focused approach. Through careful analysis, open communication and intelligent use of data and technology, we deliver transparent solutions tailored to our client's needs.

By working in close partnership and maintaining a clear focus on outcomes, we enable confident decision-making and support sustainable, long-term success.

Lookthru helps public sector entities by designing and delivering cloud-based analytics solutions, including reporting tools, KPI structures and interactive dashboards, using established business intelligence technologies such as Azure data services and Power BI. Our service focuses on delivering intuitive visualisations and actionable reporting across existing cloud environments.

We enable organisations to derive measurable value from data by implementing analytics solutions that are secure, appropriately governed and aligned with strategic objectives. This service supports the sustained adoption and effective operation of cloud analytics platforms.

What can it do for you?

Help you make sense of your data and share insights more easily across teams.

By introducing clear reporting and interactive dashboards, you're able to track performance, monitor key indicators and support more informed decision making. Analytics tools are introduced in a structured manner, with governance in place to ensure data remains secure and can be trusted.

The result is better visibility of outcomes, more consistent reporting and analytic platforms which are reliable and ready to scale up as needs evolve.

Service Features

Analytics Discovery & Design - We'll work with your teams to understand reporting needs, KPI requirements and data sources.

BI Platform Setup - Configuration of cloud analytics services using technologies such as Power BI and Azure data services.

Dashboard & Report Development - Design and build of interactive dashboards and reporting solutions.

Data Modelling & Transformation - Structuring data to support consistent, accurate reporting.

Data Governance & Quality - Controls to ensure data is trusted, secure and well managed.

Integration with Existing Systems - Connecting analytics platforms to your operational data sources.

Performance & Optimisation - Monitoring and tuning to keep analytics services responsive and efficient.

Knowledge Transfer - Full documentation and support to help teams manage and develop analytics solutions.

Service Benefits

- Clearer visibility of organisational performance
- More consistent and reliable reporting
- Faster access to actionable insights
- Secure and well governed analytics platforms
- Dashboards that adapt as needs change
- Reduced manual reporting efforts
- Better data driven decision making

At LookThru, we are committed to delivering clarity, transparency and value in the work we do. We commit to working in close partnership with our clients, listening to their requirements and providing intelligent, insight-led solutions that they can trust.

Through open communication, consistent quality and a focus on long-term outcomes, we strive to exceed expectations and support confident decision-making at every stage of the journey.

A large, dark blue double quote icon.

I am proud of our unwavering commitment and dedication to service excellence. We believe in working in true partnership with our clients, focusing on outcomes that matter and supporting them through transformational change. Our goal is to deliver meaningful results that stand the test of time. “

Josh Stevenson
Principal Architect

Customer requirement

We work closely with stakeholders to understand objectives, constraints and priorities to ensure we deploy the correct skill set to meet the clients needs from the offset.

Confirm Availability

We ensure the appropriate team is available and onboarded, maintaining continuity throughout the project.

Coordinate & Streamline

Based on our experience, we align ways of working, governance and delivery from the outset, enabling effective collaboration through clear communication, escalation routes and regular reviews.

Define & Manage Scope

We clearly define and manage the scope of services, including deliverables, timelines, quality standards, and dependencies. This ensures aligned expectations and a controlled, transparent delivery process.

Review & Offboard

Before work commences, we review and finalise the service agreement. At offboarding, we ensure a smooth transition, to ensure knowledge transfer and clear documentation are handed over.

Lookthru holds the following accreditations, which collectively demonstrate our commitment to quality management, information security and ethical service delivery.

Lookthru delivers secure, reliable and data-led services to public sector and regulated organisations. Our delivery approach is underpinned by robust governance, clearly defined operational controls and a strong focus on information security, service quality and risk management.

Our accreditations demonstrate that Lookthru operates in alignment with recognised international standards and has been independently assessed against rigorous criteria. These certifications provide assurance that our people, processes and systems support consistent, compliant and well-governed service delivery across the full service lifecycle, from discovery and design through to implementation and live service support.

They also evidence our commitment to protecting client and user data, managing information and operational risk effectively and continuously improving the quality and resilience of our services. Lookthru maintains responsible and ethical business practices to ensure fair and compliant employment practices across the organisation, supporting sustainable and reliable delivery for public sector clients.
