Valos combines intelligent automation and valuer expertise to transform the valuation process

Trusted by firms of all sizes across the UK

Valos was created by valuers, software developers, and engineers to **remove the repetitive, manual, and administrative tasks** that slow down the valuation process.

The Valos platform blends automation, machine learning, and AI with professional judgement to **enhance, not replace, the expertise at the heart of valuations.**

Our customers are trusted because of their people, their standards, and their professional insight, **qualities that technology cannot replace.**

By **empowering valuation teams with technology**, we enable them to focus on analysis and client advice, while benefiting from higher quality, greater efficiency, and improved profitability.

Today, **Valos is the market leader** in technology solutions for valuation firms, lenders, and panel managers.

Valos is the market leader in data gathering and report generation for the property industry

The Valos USP

Valos has been designed to be used across **all property use classes and for all purposes** to help with automating property data gathering and report generation.

The platform **aggregates statutory enquiry information** from multiple sources and generates **compliant valuation reports** with maps and plans through intelligent document automation

By streamlining these processes, **Valos empowers surveyors** by alleviating mundane, repetitive, and administrative tasks, allowing them to focus on their core expertise!

Valos enables firms to **increase the quality, efficiency, and profitability of reporting.**

The logo features the word "VALOS" in a white, sans-serif font. The letter "V" is stylized with a white arc at its base, resembling a wide angle or a stylized letter. The background is a dark blue gradient with diagonal lines in lighter shades of blue and teal.
