

Secure Cloud

Service Definition

G-Cloud 15

SERVICE SUMMARY

Secure Cloud Services

Qberry delivers UK-hosted, ISO 27001 and Cyber Essentials Plus certified secure cloud infrastructure for the public sector.

Our service provides compliant data storage, protected networking, identity and access management, resilience, monitoring, and support, enabling organisations to migrate, operate, and scale workloads while meeting GDPR and government security and protection requirements

SERVICE SUMMARY

AWS Cloud Migration Services

Features

- UK-hosted infrastructure ensuring data sovereignty compliance and public sector assurance.
- ISO27001 Cyber Essentials Plus certifications providing independently audited security controls.
- Secure networking enabling segmentation firewalling controlled ingress and egress.
- Identity access management supporting role-based access and multi-factor authentication.
- Encrypted storage protecting data using government-approved cryptographic standards.
- Continuous monitoring providing real-time threat detection logging and alerting.
- High availability architecture delivering redundancy resilience and service continuity.
- Backup disaster recovery enabling automated retention and rapid restoration.
- Scalable compute storage supporting demand-based capacity and performance.
- Managed service support providing UK-based operations incident management.

Benefits

- Improves cyber security posture reducing public sector risk exposure.
- Supports regulatory compliance meeting GDPR government security obligations.
- Ensures data sovereignty for sensitive public sector workloads.
- Reduces operational overhead through managed cloud service delivery.
- Improves service reliability enabling resilient public sector operations.
- Accelerates digital transformation through rapid secure cloud adoption.
- Improves value-for-money using scalable consumption-based infrastructure models.
- Enhances business continuity protecting critical public services availability.
- Improves audit readiness supporting compliance reporting and governance.
- Strengthens access governance improving accountability and data protection.
