EntityShift deliver comprehensive, end-to-end professional services for Microsoft Dynamics 365 Finance & Operations, enabling organisations to modernise their financial, supply chain, and operational capabilities with confidence. Our approach places customer enablement at the centre, ensuring that every solution is designed not only to meet immediate requirements but to empower internal teams with the knowledge, tools, and capability to operate, optimise, and evolve their D365 environment independently.

Level Definitions - 1. Follow

Autonomy: Works under close supervision. Uses little discretion. Is expected to seek guidance in expected situations.

Influence: Interacts with immediate colleagues.

Complexity: Performs routine activities in a structured environment. Requires assistance in resolving unexpected problems.

Business Skills: Uses Basic information systems and technology functions, applications, and processes. Demonstrates an organized approach to work. Learns new skills and applies newly acquired knowledge. Has basic oral and written communication skills. Contributes to identifying own development opportunities.

Level Definitions - 2. Assist

Autonomy: Works under routine supervision. Uses minor discretion in resolving problems or enquiries. Works without frequent reference to others.

Influence: Interacts with and may influence immediate colleagues. May have some external contact with customers and suppliers. May have more influence in own domain.

Complexity: Performs a range of varied work activities in a variety of structured environments.

Business Skills: Understands and uses appropriate methods, tools and applications. Demonstrates a rational and organized approach to work. Is aware of health and safety issues. Identifies and negotiates own development opportunities. Has sufficient communication skills for effective dialogue with colleagues. Is able to work in a team. Is able to plan, schedule and monitor own work within short time horizons. Absorbs technical information when it is presented systematically and applies it effectively.

Level Definitions - 3. Apply

Autonomy: Works under general supervision. Uses discretion in identifying and resolving complex problems and assignments. Usually receives specific instructions and has work reviewed at frequent milestones. Determines when issues should be escalated to a higher level.

Influence: Interacts with and influences department/project team members. May have working level contact with customers and suppliers. In predictable and structured areas may supervise others. Makes decisions which may impact on the work assigned to individuals or phases of projects.

Complexity: Performs a broad range of work, sometimes complex and non-routine, in a variety of environments.

Business Skills: Understands and uses appropriate methods, tools and applications. Demonstrates an analytical and systematic approach to problem solving. Takes the initiative in identifying and negotiating appropriate development opportunities. Demonstrates effective communication skills. Contributes fully to the work of teams. Plans, schedules and monitors own work (and that of others where applicable) competently within limited deadlines and according to relevant legislation and procedures. Absorbs and applies technical information. Works to required standards. Understands and uses appropriate methods, tools and applications. Appreciates the wider field of information systems, and how own role relates to other roles and to the business of the employer or client.

Level Definitions - 4. Enable

Autonomy: Works under general direction within a clear framework of accountability. Exercises substantial personal responsibility and autonomy. Plans own work to meet given objectives and processes.

Influence: Influences team and specialist peer internally. Influences customers at account level and suppliers. Has some responsibility for the work of others and for the allocation of resources. Participates in external activities related to own specialism. Makes decisions which influence the success of projects and team objectives.

Complexity: Performs a broad range of complex technical or professional work activities, in a variety of contexts.

Business Skills: Selects from applicable standards, methods, tools and applications. Demonstrates an analytical and systematic approach to problem solving. Communicates fluently orally and in writing and can present complex technical information to both technical and non-technical audiences. Facilitates collaboration between stakeholders who share common objectives. Plans, schedules and monitors work to meet time and quality targets and in accordance with relevant legislation and procedures. Rapidly absorbs new technical information and applies it effectively. Has a good appreciation of the wider field of information systems, their use in relevant employment areas and how they relate to the business activities of the employer or client. Maintains an awareness of developing technologies and their application and takes some responsibility for personal development.

Level Definitions - 5. Ensure or Advise

Autonomy: Works under broad direction. Is fully accountable for own technical work and/or project/ supervisory responsibilities. Receives assignments in the form of objectives. Establishes own milestones and team objectives, and delegates responsibilities. Work is often self initiated.

Influence: Influences organization, customers, suppliers and peers within industry on the contribution of own specialism. Has significant responsibility for the work of others and for the allocation of resources. Makes decisions which impact on the success of assigned projects i.e. results, deadlines and budget. Develops business relationships with customers.

Complexity: Performs a challenging range and variety of complex technical or professional work activities. Undertakes work which requires the application of fundamental principles in a wide and often unpredictable range of contexts. Understands the relationship between own specialism and wider customer/ organizational requirements.

Business Skills: Advises on the available standards, methods, tools and applications relevant to own specialism and can make correct choices from alternatives. Analyses, diagnoses, designs, plans, execute and evaluates work to time, cost and quality targets. Communicates effectively, formally and informally, with colleagues, subordinates and customers. Demonstrates leadership. Facilitates collaboration between stakeholders who have diverse objectives. Understands the relevance of own area of responsibility/ specialism to the employing organization. Takes customer requirements into account when making proposals. Takes initiative to keep skills up to date. Mentors more junior colleagues. Maintains an awareness of developments in the industry. Analyses requirements and advises on scope and options for operational improvement. Demonstrates creativity and innovation in applying solutions for the benefit of the customer.

Level Definitions - 6. Initiate or influence

Autonomy: Has defined authority and responsibility for a significant area of work, including technical, financial and quality aspects. Establishes organizational objectives and delegates responsibilities. Is accountable for actions and decisions taken by self and subordinates.

Influence: Influences policy formation on the contribution of own specialism to business objectives. Influences a significant part of own organization and influences customers/suppliers and industry at senior management level. Makes decisions which impact the work of employing organizations, achievement of organizational objectives and financial performance. Develops high-level relationships with customers, suppliers and industry leaders.

Complexity: Performs highly complex work activities covering technical, financial and quality aspects. Contributes to the formulation of IT strategy. Creatively applies a wide range of technical and/or management principles.

Business Skills: Absorbs complex technical information and communicates effectively at all levels to both technical and non-technical audiences. Assesses and evaluates risk. Understands the implications of new technologies. Demonstrates clear leadership and the ability to influence and persuade. Has a broad understanding of all aspects of IT and deep understanding of own specialism(s). Understands and communicates the role and impact of IT in the employing organization and promotes compliance with relevant legislation. Takes the initiative to keep both own and subordinates' skills up to date and to maintain an awareness of developments in the IT industry.

Level Definitions - 7. Set strategy or inspire

Autonomy: Has authority and responsibility for all aspects of a significant area of work, including policy formation and application. Is fully accountable for actions taken and decisions made, both by self and subordinates.

Influence: Makes decisions critical to organizational success. Influences developments within the IT industry at the highest levels. Advances the knowledge and/or exploitation of IT within one or more organisations. Develops long-term strategic relationships with customers and industry leaders.

Complexity: Leads on the formulation and application of strategy. Applies the highest level of management and leadership skills. Has a deep understanding of the IT industry and the implications of emerging technologies for the wider business environment.

Business Skills: Has a full range of strategic management and leadership skills. Understands, explains and presents complex technical ideas to both technical and non-technical audiences at all levels up to the highest in a persuasive and convincing manner. Has a broad and deep IT knowledge coupled with equivalent knowledge of the activities of those businesses and other organizations that use and exploit IT. Communicates the potential impact of emerging technologies on organizations and individuals and analyses the risks of using or not using such technologies. Assesses the impact of legislation, and actively promotes compliance. Takes the initiative to keep both own and subordinates' skills up to date and to maintain an awareness of developments in IT in own area(s) of expertise.

Enough about us.
Let's talk about you.
