Pricing considerations:

Pricing to be viewed alongside the summary on the following page and our Service Definition Document

Table contains maximum costs, discounts are available based on size of space and length of contract

* & ** The number of sensors for each space will be specified based on a review on the building size and layout. For guidance:

- * one sensor is typically required per 300 sq ft space
- ** four sensors are typically required per 300 sq ft space

^ Costs included are for guidance and based on c.1k desks in operation, this will scale up/down based on order size

Hardware excludes connectivity

Subscription*	Energy	Indoor Air Quality	Occupancy	Fire safety	For Buildings that require:
