

Choose your deployment package, self-hosted or on cloud. Wire can be installed on-premises, STACKIT private cloud, and on Wire's cloud environment.
Choose the setup that best fits your organization's needs.

Description		Core Product	Deployment	Initial / Add On	Units	Up to # of Users	List price
Cloud	For teams looking for the most secure messenger, without technical specifications or particular deployment setups. Get all the benefits of Wire, on our cloud, while staying secure. No one, not even Wire can see your information. Wire's cloud deployment is a fully managed solution based on the provider's infrastructure. This option offers rapid deployment and easy scalability without the need for in-house hardware. It enables immediate implementation and minimal maintenance, as automatic updates and maintenance are handled by the provider. This solution is particularly suitable for organizations that want quick and easy deployment.	Wire Cloud Basic
