

Pricing Document – Kaseya Vonahi vPenTest

Document version: 1.0

Last updated: 30 January 2026

Supplier: Kent MSP Ltd

Service: Kaseya Vonahi vPenTest (managed)

1. Pricing approach

This pricing document supports completion of the CCS G-Cloud Order Form and Schedule 2. It outlines pricing units and how total price is calculated. It does not amend CCS template terms.

2. Mechanism for establishing price

Total Price = Baseline Pricing + Fixed Onboarding – Framework Discount.

3. Baseline pricing (recurring charges)

3.1 Per month-assessment model:

- Internal network penetration test (per IP address): £8
- External network penetration test (per IP address): £12
- Combined internal & external test package (up to 250 IPs): £1200
- Multi-site internal penetration test (per additional 250 IPs): £900
- Includes automated exploitation, reporting, and activity logs.

3.2 Add-ons & advanced features

- Advanced assessment configuration: £150 per assessment
- Custom scope validation: £95 per assessment
- Extended reporting pack (technical + exec reports): £120

3.3 Support tier add-ons

- Standard support: Included
- Enhanced support: £250 per organisation per month
- Managed security reporting tier: £750 per organisation per month

4. Fixed onboarding

- Tenant setup: Free
- Internal agent deployment assistance: Free
- Initial configuration and validation test: Free

5. Framework discount

Framework discount: 15%

6. Common additional costs

- On-site services (per day): £850
- Large-scale multi-site assessments
- Bespoke reporting and consultancy

7. Worked example

Example: Monthly internal + external assessment over 12 months.

Baseline = (£1200) × 12 months = £14,400

Discount = 15%
