Wallet IT Ltd

Pricing Document Service Name: Quality Assurance Consultancy – QAT & Performance

Testing Supplier: Wallet IT Ltd

Framework: G-Cloud 15

Lot: 4 – Cloud Support (Quality Assurance and Performance Testing)

Version: 1.0

Date: January 2026

1. Pricing Model Overview

All pricing is based on day rates for consultant time (8-hour standard working day, excluding travel/expenses unless stated). Rates are fixed for the framework duration and exclude VAT (added at prevailing rate).

Invoicing occurs monthly in arrears based on actual days/hours worked (timesheets approved by Buyer). Minimum engagement: 5 days (or as agreed in Order Form).

Rates align with SFIA (Skills Framework for the Information Age) classifications where applicable (e.g., Testing roles under SFIA categories like TEST). Full day rates submitted separately in the Digital Marketplace portal; this document provides context, application, and any additional elements.

2. Core Day Rates

The following rates apply to the Services (QAT Testing and Performance Testing consultancy). These match the rates provided in the framework application:

Advisory services: £800–£1,200 per consultant per day

Delivery services: £450–£1,400 per consultant per day

Managed services: From £6,000–£15,000 per month depending on scope

Tooling costs are excluded and agreed separately if required.

Rates include all standard delivery (remote), test planning, execution, reporting, and defect management. Partial days charged pro-rata (minimum 0.5 day).

3. Additional Charges and Extras

- Out-of-Hours / Weekend Support — +50% uplift on standard day rate (for urgent releases or critical performance testing outside Mon–Fri 09:00–17:30 GMT).

- On-Site Delivery — Standard day rate + reasonable travel & subsistence expenses (pre-agreed, evidenced receipts; UK travel only). Remote delivery is default and included.
- Bespoke Tool Development / Non-Standard Customisation — Scoped and quoted separately as additional days at applicable rate (e.g., custom performance simulation scripts beyond standard JMeter/Cypress usage).
- Expenses — Reimbursed at cost for agreed items (e.g., specialist tool licences if Buyer requires non-standard). No mark-up.

No setup/onboarding fees for standard engagements. No data extraction/exit fees.

4. Discounts and Special Pricing

- Volume Discount — 5% off total invoice value for engagements of 50+ days in a single Call-Off Contract.
- Educational Organisations — 10% discount on all day rates (applies to qualifying UK educational institutions; evidence required).
- Long-Term Engagements — For Call-Off Contracts >12 months, negotiated retainers available (e.g., fixed monthly capacity at discounted effective rate; agreed in Order Form).

5. Example Cost Calculations

Example 1: 20-day QAT Testing Engagement

- 10 days Mid-Level QA Engineer: $10 \times \text{£}500 = \text{£}5,000$
- 10 days Senior QA Consultant: $10 \times \text{£}600 = \text{£}6,000$
- Total (excl. VAT): $\text{£}11,000$
- With volume discount (if applicable): $\text{£}10,450$

Example 2: Performance Testing Sprint (Out-of-Hours)

- 5 days Senior Performance Lead (standard): $5 \times \text{£}600 = \text{£}3,000$
- 2 days out-of-hours uplift (+50%): $2 \times \text{£}900 = \text{£}1,800$
- Total (excl. VAT): $\text{£}4,800$

These examples are illustrative; actual costs depend on the Order Form and agreed resources.

6. Payment Terms

- Invoices payable within 30 days of receipt via electronic transfer.
- Late payments attract statutory interest (8% above Bank of England base rate).
- All pricing compliant with G-Cloud framework; no hidden charges.

7. Notes

- Rates exclude VAT.
- Pricing valid for the framework term; no POA or ranges used.
- For full rate card details (including SFIA mappings), refer to rates submitted in the Digital Marketplace application portal.
- Buyers calculate total contract value easily from Order Form (e.g., estimated days × rate).
