

Arbor MIS

Modules and Features for MATs
FY26

MAT MIS Modules and Features

Arbor includes a full business intelligence solution, designed for educators, out of the box - MAT MIS. The full Trust, any clusters, and each school will have their own dashboards and reports within it, and you can drill down from one layer of data to the next, right down to the level of the individual student. It is even possible to drill down to access a specific school MIS and take actions centrally, such as to set up a meeting with school staff, or help schools set up modules according to Trust policies.

As a cloud-based system, all information is processed in real-time and pushed to the people who need it. All data entered, from registration marks to behaviour incidents, immediately updates throughout every system to inform smart in-built dashboards and customisable reports. The cohesive architecture of Arbor's MAT MIS means that smart analysis can scale to any number of schools.

The MAT MIS is available with 4 tiers of features:

Essentials	Plus	Advanced	Enterprise
Features include: • Login to MIS • Live National Benchmarks • Context, Attendance, and Behaviour dashboards • Custom Reports • Live Feeds • Create clusters • Central team staff records • Staff Development • Single Central Record • HR integrations	All Essentials features + • Centralised emails • Bulk actions • Attendance thresholds • Assessment analysis • Pushdowns (inc. Assessment, UDFs, Pay Scales, Business Roles, and Permissions) • Census audit • New School Year Setup audit • BI Connector • BI Viewer	All Plus features +	All features + • Custom Data Warehouse
Arbor Workflows: • See school level workflows • Central team workflows • Template library	Arbor Workflows: • Workflow Pushdown • Update School MIS • Custom roles • Asset library • Analytics dashboard • Filter workflow views	Arbor Workflows: • Restore and archive workflows • Connect to cloud based spreadsheets (Google / Microsoft) • Update approved third party software	

School MIS Modules and Features

Arbor's School MIS is available with three tiers of features, and is designed to streamline school processes by automating as many repetitive tasks as possible.

Security

Essential security and permissioning features.

Features	Core	Comms	Perform
