1.0 Scope of our services

Accenture is focusing on strategy, consulting, implementation, and adaptive managed support of the SAP solution set. We are an award-winning leading SAP Platinum Partner in the UK. We innovate together with SAP, creating advanced capabilities and packaged solutions clients cannot access anywhere else.

Accenture is a widely recognised professional services IT company and as a go-to partner for SAP implementations, consultancy, and support. With countless successful cloud implementations, we understand the importance of ensuring a rapid turnaround from project inception to go-live alongside the assurance of quality and consistency. Now as part of Accenture, we can draw the best industry and tech expertise in the world.

Accenture's greatest asset is its people and with a team of over 75,000 SAP practitioners with industry-specific knowledge. Accenture possesses the depth of experience and capability to ensure your investment in SAP is a success. Not only delivering a successful implementation, but also by considering ways that the solution can be extended to implement key improvements and innovations to your organisational processes now and into the future.

We are the SAP partner for high-potential businesses of tomorrow.

1.1 Cloud Hosted Deployment Approach

At Accenture, our customers have continually looked to us to provide additional capability in managing workloads, this has included scaling existing SAP systems, building capacity to run pilot SAP projects or move existing workloads from in-house data centres. As these requests increased in scope and complexity, Accenture is pleased to offer a fully hosted and managed SAP programme on Microsoft Azure, Amazon Web Services (AWS) or Google Cloud Platform (GCP) as an option to your current programme.

Depending on the needs of your business, the fully managed hosted solution that Accenture propose would ensure that the complete solution is managed in its entirety from project set-up through to Go-Live and beyond. Using this approach all the SAP systems would be installed and hosted by Accenture on Microsoft Azure, AWS or GCP with Accenture providing all the infrastructure, software, and landscape management services.

Accenture can help customers with the following areas:

- **Planning and Strategy:** Accenture works with you to assess your current SAP environment, define your cloud migration goals, and develop a customized migration plan.
- **Application Assessment and Refactoring:** They will evaluate your SAP applications to identify any dependencies on on-premises infrastructure and recommend refactoring (code modification) for optimal cloud performance.
- **Migration Process:** They handle the migration process itself, ensuring secure and efficient transfer of data and applications to the cloud platform.
- **Post-Migration Optimisation:** Accenture helps you optimize your SAP applications for the cloud environment, ensuring they run smoothly and take full advantage of cloud capabilities.

1.2 Conclusion

At Accenture we recognise the importance of a collaborative approach in delivering all IT enabled business transformation projects and from the outset of any project we make it our business to become embedded within your organisation so that we operate as a single high-performance team. Accenture believe this approach is proven to not only deliver the project on time and within budget but also enables us, collectively, to react quickly to the inevitable risks and issues that arise before they have an adverse impact on the project's progress.

By leveraging Accenture's expertise in cloud migration and SAP solutions, businesses can achieve a seamless transition to the cloud, unlock the benefits mentioned above, and gain a competitive edge.
