1.0 Scope of our services

Implementing the Cerner Millennium EPR is a substantial achievement. As a key component in your digital journey you will be aware the EPR can be a catalyst for ongoing transformation and improvement. As such you will want to develop and get even more value from your investment. Users can also identify new ways in which it can better support and further enable what they do.

How do you pursue emerging objectives and ideas for improvement, continue to support clinical and operational adoption, and fully embed change as a cultural norm?

This service can help you further exploit your Cerner EPR to drive ongoing operational and clinical transformation in your organisation. The results will be increased EPR adoption, the identification and achievement of new benefits and ultimately, improved clinical quality.

The significant experience includes:

- Requirements definition: Working with clinical and non- clinical staff to define new requirements aligned with organisational or departmental objectives
- Benefits: Assisting with the identification of change benefits
- Workflow design: Agreeing and documenting new "to-be" workflows and revising Standard Operating Procedures accordingly
- Testing: Creating test approaches, plans and scripts. Ensuring users have appropriate input into both testing and training. Managing testing and facilitating User Acceptance Testing (UAT)
- Build and Configuration: Technical implementation across the full range of Cerner solutions
- Knowledge Transfer: Providing a "Dev-ops" development and deployment legacy for your IM&T teams to adopt. Helping prepare your teams to support new functionality

- Go Live Support: Help manage go live preparation, the roll out of new solutions and co-ordinate post-go Live support to maximise adoption and benefits realisation

The outcomes we have successfully delivered for our clients include:

- Successfully built functionality to enable an acute Trust to achieve their VTE targets
- Helped design and then built functionality enabling a Trust to demonstrate achievement of ambitious CQUIN targets
- Supported various Trusts' roll out of new EPR functionality including preparing for Go Live and helping to plan for and provide early life support to support adoption and benefits realisation.

4.0 About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organisations build their digital core, optimise their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 799,420 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities
