4.0 About Accenture 5

1.0 Scope of our services

For more than a half-century, Accenture has helped clients in different industries embrace technology innovations, including traditional IAM systems.

In the new digital era, Accenture has been a key participant in collaborating with standards bodies and global organizations, such as W3C and Trust Over IP, to drive better digital identity. In partnership with the World Economic Forum, Accenture helped launch Known Traveller Digital Identity for seamless air travel, and has worked with organizations across education, health, supply chain, finance, and more to build innovative decentralized identity and IAM systems.

Accenture has stellar capabilities to integrate a combined IAM and decentralized identity system with core organizational and business functions and cutting-edge technologies to create a holistic, future-forward solution to meet the needs of users and businesses, such as Blockchain, Biometrics, Analytics, AI, and more. As a part of an organization's journey to actualize the benefit of IAM plus decentralized identity, Accenture can assist organizations with understanding the technology landscape, planning an innovative technology strategy, and designing and co-creating digital identity systems that can launch them to the forefront of digital experiences and ways of working.

Our end-to-end decentralised identity and biometrics offerings will help you define the strategy and integrate with your existing architecture and unlock future potential. Our world leading subject matter advisors are board members and active contributors to international standards working groups in this space. With our unmatched knowledge, specialised skills, and capabilities we are positioned to build, deploy and operate decentralised digital identity solutions effectively and efficiently.

Our services include:

- Advisory, define strategy and processes for decentralised identity initiatives
- Architecture, solution design, technical design and implementation
- Development and system integration of identity solutions with custom capabilities
- Delivery coordination, deployment support, testing, defect management and resolution
- Advisory and development of identity, blockchain and biometric interoperability standards
- Credential Management and Verification using different technologies; SSI, biometrics, PKI
- Biometrics & unique identity services; service design, algorithm testing, benchmarking
- Third party vendor assessment, evaluation, and management
- Simplification of integration complexities for scale and speed
- Operations, support from pilot to scaling, reporting, future roadmap considerations

Benefits to your organisation:

- Organisational alignment around decentralised identity strategy, roadmap, and technology
- Expertise from industry leaders in decentralised digital identity and biometrics
- Reusable, scalable, and proven accelerator capability that ensures production-ready solutions
- Design with privacy at the core, compliant with global regulations
- SSI or multi-ID archetypes management
- Flexible deployment options (cloud, hybrid, as a managed services)
- Identity, biometrics and blockchain international standards and trust framework alignment

- Vendor agnostic, convene across industries and sectors to build ecosystems
- Enhancing user experiences through personalization, efficiency, security and automation improvements
- Leverage our accelerators; thought leadership, assets, methodologies, frameworks and toolkits
