Introduction

Edenhouse Solutions Limited is now part of Accenture, focusing on strategy, consulting, implementation and adaptive managed support of the SAP solution set. We are an award-winning leading SAP Platinum Partner in the UK. We innovate together with SAP, creating advanced capabilities and packaged solutions clients can't access anywhere else.

Edenhouse are widely recognised in the mid-sized businesses industry as a go-to partner for SAP implementations, consultancy, and support. With many successful cloud implementations already completed, we understand the importance of ensuring a rapid turnaround from project inception to go-live alongside the assurance of quality and consistency. Now as part of Accenture, we can draw the best industry and tech expertise in the world

Edenhouse's greatest asset is its people and with more than 150 consultants, all of whom are focused on SAP and with an average of 15 years' experience in the SAP solution set. Edenhouse possess the depth of experience and capability to ensure your investment in SAP is a success. Not only delivering a successful implementation, but also by considering ways that the solution can be extended to implement key improvements and innovations to your organisational processes now and into the future.

We are the SAP partner for high-potential businesses of tomorrow.

2.1 SAP Analytics Cloud

SAP Analytics Cloud sits alongside S/4HANA embedded analytics as an enterprise-wide reporting platform. It can blend data from different sources, enabling compelling data visualisations and KPI reports to be developed. Data connections provide live access to SAP S/4HANA data alongside SQL database sources, cloud storage like Google Drive, and CSV files. It also contains built in social collaboration tools that help you work and share information with others. SAP provide a set of tools called Smart Assist and with these tools you have predictive functionality, smart transformations to clean and prepare your data, and create clusters of comparable data points automatically.

SAP Analytics Cloud can be used to provide summarized and combined data views across multiple systems, including S/4HANA live data and will enable your company to gain control over various data sources and obtain a single version of the truth. The combination of embedded analytics built within the core S/4HANA and Analytics Cloud solutions will provide your company with a robust and easy to use and consume reporting platform for the users.

An example of the output from Analytics Cloud is shown below:

The following diagram provides some examples of what is generally available in the S/4HANA solution through embedded analytics and the extended functionality to provide strategic analytics as provided by a variety of Analytics Cloud tools. The ability for users to filter and create their own analytics is simple to use and provides an effective self- service ad-hoc reporting solution.

Embedded Analytics

FIORI Apps

Query Browser

Query Builder

Multi Dimensional Drill

Strategic Analytics

Analysis for Office

Analytics Cloud

The Analytics Cloud reporting platform provides flexible systems management to confidently deploy and standardize reporting on a proven, scalable, and adaptive service-oriented architecture. The latest Business Intelligence platform includes a suite of tools for transforming data into useful information and delivering it to the people who need it. The suite includes:

- Creation of stories to deliver reporting requirements
- Analysing and exploring data
- Viewing and visualizing information
- Insights to provide guidance on your data

- Data Discovery to take raw data, perform automated data discovery showing influencing factors and what-if analysis
- Predictive Analysis to show more meaningful analysis
- Application Design to allow you to create bespoke user driven dashboard with ability to produce closed loop process i.e. perform an action in your transactional system based on reporting output
- Powerful planning and Forecasting module

2.2 Conclusion

At Accenture Edenhouse we recognise the importance of a collaborative approach in delivering all IT enabled business transformation projects. From the outset of any project we make it our business to become embedded within your organisation, so that we operate as a single high-performance team. Edenhouse believe this approach is proven to not only deliver the project on time and within budget, but also enables us, collectively, to react quickly to the inevitable risks and issues that arise before they have an adverse impact on the project's progress.

We have tried to avoid a chapter and verse story of our experience and full-service offerings, favouring instead the opportunity to engage with you directly. We can evidence a long history of quality consultancy services and support and believe with our experienced consultants and expert skills, best practices and rapid deployment methodologies we are the ideal partner for your IT business transformation operating as highly skilled SAP specialists and your dedicated support partner.

Please contact us further to discuss your requirements and options in more detail.
