4.0 About Accenture 4

1.0 Scope of our services

Cerner Millennium Code Upgrades are short duration technical projects which are expected to be delivered 'in the background' with minimal impact to end-users. In addition to getting the 'latest and the greatest' capability, the upgrades are also an opportunity to resolve longstanding service defects and service improvement change requests.

A short duration project requires quick onboarding of the project team who can hit the ground running, ensure effective delivery and do a safe handover to BAU.

We are a **one-stop-shop** for all activities required to deliver a safe code upgrade within time and budget.

We have significant experience and skills to support the entire project lifecycle

- **Leadership:** Managing and leading the project and workstreams end to end, co-ordinating activities and managing risks across Trust and external teams. This includes:
 - Management of third parties including Cerner
 - Management of Trust staff allocated to the project
- **Operational Support:** Provide transformation support for any changes required by the new code to ensure that AS- IS processes are not compromised
- **Quality Assurance:** Support end-to-end from test preparation, test automation, regression testing, defect management, setting up and controlling quality gates and final go-live testing
- **Cutover, Go Live and ELS:** Focused support throughout the cutover and early life support period to ensure smooth transition to BAU

Why Accenture?

- We work collaboratively with the Trust as part of one project team
- We are flexible when deploying resources and adjust based on project requirements
- We are known to Cerner and acknowledged as SMEs
- We advise you about challenges and pitfalls based on our experience from previous implementations

4.0 About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organisations build their digital core, optimise their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 799,420 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities
