1.0 Scope of our services

Partner with Accenture on your Journey to Cloud and benefit from our tools, capabilities, ecosystem and unparalleled experience.

Strategy, Assessment and Roadmap

We help you define your Journey to Cloud with our suite of application-led services that include industry-tailored insights and strategies to prioritise business planning and actions to maximise results. Our services in this area include:

- **Cloud Strategy:** Use cloud to shape the direction of your IT in a way that maximises shareholder and business value.
- **Cloud Application Assessment, Planning and Migration:** Plan and prepare for your application migration program by gathering application inventories, assessing application portfolios, confirming the fit for the target platform, and determining the migration type and effort required.
- **Cloud Infrastructure Assessment and Planning:** Plan and prepare for your public, private, or hybrid cloud platform and infrastructure deployment program, including PaaS and IaaS.

Cloud Transformation and Migration

We help you modernise and migrate applications, build new cloud-based applications, and transform your architecture and infrastructure while moving to a new technology operating model. At Accenture, we deliver leading best practices in:

- **Cloud Journey Management:** Manage a successful transformation execution while maintaining service to the business.
- **DevOps Services:** Define, implement and run DevOps to compete successfully in today's high-velocity business world.

Cloud Migration Services

We work with our clients to plan and execute application migrations including remediating and re-platforming, modernising for Cloud or Cloud platforms (when needed) and preparing applications for deployment to the target Cloud platform. Bundling value proposition in our offering, our industry expertise brings value in various Cloud Migration services. They are:

- **Cloud Application Modernisation:** Rapidly modernise your application portfolio and unleash cloud value.
- **Cloud Native Custom Development:** Custom-build and maintain elastic, multi-tenant applications engineered to take full advantage of cloud architectures. Such as Salesforce, Workday, Google, Pega, Microsoft, Oracle, SAP.
- **Platform as A Service:** Develop and deploy cloud-based applications using public, private, or hybrid cloud platforms.
- **Cloud Infrastructure Transformation:** Design and build IaaS and PaaS clouds, as well as migrate workloads and operations platforms.

Cloud Management and Optimisation

We provide Managed Services that deliver a consistent customer experience, highly reliable cloud services, and billing analytics. These Managed Services include:

- **Cloud Operations:** Cloud infrastructure outsourcing includes support, cloud engineering services, cloud service management, service desk, and monitoring.
- **Security Operations:** Flexible security operations secure your cloud environments and infrastructure.

- **Cloud Optimisation Services:** Services manage your cloud spend through analytics, actionable recommendations, operational improvement, and application remediation and re-architecture.
- **Application Management:** Application support services help you manage cloud-based applications.
- **Business Process Operations:** A business layer on top of our cloud technology assets and services delivers improved business outcomes.

2.0 Approach

“Accelerate for Cloud” supports and enables our migration methodology in all phases of the application migration program – automating recurring tasks, compressing delivery timelines, and providing a single point of process control and visibility. Our success has been codified in proprietary tools, automated capabilities, and collaboration models.

Our approach is shown in the below diagrams:
