1.0 Scope of our services

Approach

We follow a FinOps adoption process designed by the FinOps Foundation.

Step	Description	How we can help you:
Plan	During this phase, we identify the key pain points and impacted groups. We also define the future state including KPIs, earlyadopter teams, and find the right place for a FinOps team within the organisational practice.	Consulting • Define the cloud work strategy from a financial perspective. • Build FinOps awareness within your teams and enable a cultural change. • Deliver an introduction to FinOps for the IT and Finance departments. • Create a change plan for your application and infrastructure landscape.
Prepare	We define taxonomies for tags and metadata, implement reporting and alerting, and prepare forecasting models.	Delivery • Cost optimisation • Reserved instances • Cloud automation • Right-sizing of cloud services • Assistance in your negotiations with cloud vendors • Optimisation of cloud environments • Setting up yearly improvement plans
Launch	We launch the initiative on pilot teams.	
Run	We expand the implementation to new teams and departments and extend the process according to the FinOps maturity model.	

Our expertise

Accenture is a mature technology partner, offering end-to-end services tailored to the unique needs of our customers. The depth of our IT consulting experience enables us to accurately assess your situation and propose solutions that address your exact needs.

The iterative journey of our service is based on FinOps Foundation’s framework.

We are technology experts specialising in cloud services, delivering bespoke solutions to clients across various industries. As such, we not only provide FinOps recommendations and plans but also address their technical execution. For your company, we will design and develop a tailor-made solution that will help you manage your cloud cost in the most efficient way.

4.0 About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organisations build their digital core, optimise their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 799,420 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities
