1.0 Scope of our services

Accenture has deep expertise across secure cloud architectures, regulated environments, and large-scale transformation to help you design, build, and operate Google Distributed Cloud air-gapped (GDC air-gapped) environments. Combining our expertise working across UK government clients and highly regulated industries, with our global security, strategy & consulting, infrastructure, and industry capabilities with leading Google Cloud knowledge, we can assist you across the full lifecycle—from strategy and architecture through implementation, accreditation, and managed operations.

Our Services include:

- I. Strategy, roadmap, and business case
Develop a robust GDC air-gapped cloud strategy, business case, and roadmap to shape a cloud journey that is aligned with your organisational goals and delivers measurable value.
- II. Air-gapped cloud operating model
Deliver a comprehensive assessment and design of an organisation's air-gapped cloud operating model, ensuring it aligns with best practice standards and is fully fit for purpose to support the GDC air-gapped environment.
- III. Mobilising & supporting transformation
Support transformation mobilisation by providing expert guidance on transformation planning, change management, and delivery support, ensuring that all milestones and resources are effectively managed for successful outcomes. Additionally, Accenture offers governance and value realisation oversight through a dedicated value office, alongside FinOps capabilities to optimise cloud spending and accountability.
- IV. Architecture, build and integration: Conduct discovery and comprehensive assessments of workloads and data, design secure reference architectures for GDC air-gapped environments, complete platform build, configuration, and integration with existing systems, and deliver networking, identity, and access design appropriate for isolation.
- V. Mobilising & Supporting Transformation
Support transformation mobilisation by providing expert guidance on transformation planning, change management, and delivery support, ensuring that all migration milestones and resources are effectively managed for successful outcomes. Additionally, Accenture offers governance and value realisation oversight through a dedicated value office, alongside FinOps capabilities to optimise cloud spending and accountability.
- VI. Platform and DevSecOps enablement
Configure your GDC air-gapped platform to meet strict regulatory, technical and security requirements, integrating with the appropriate air-gapped networks. Host and finetune DevSecOps tooling to enable developers to build and operate at speed to reduce time to unlock new mission capabilities.
- VII. Develop new solutions & applications
Develop use cases and new applications by leveraging our Data & AI Labs, software engineering teams, reference architectures, and rapid development toolkits to accelerate innovation while ensuring compliance with government standards.
- VIII. migration services
Establish a migration factory to facilitate seamless deployment and migration of data and

applications, to improve resiliency, scalability and security, while providing existing apps access to AI and marketplace services.

IX. Service management and operations

Provide managed services or capability specific support across all service management and operations capabilities, including but not limited to service transition and acceptance management, monitoring and support, incident and change management, and service desk functions. .

X. Cybersecurity management and services

Provide end-to-end cyber security management services, including SOC capabilities, penetration testing, and guidance for complex accreditation and assurance processes.

2.0 Assets and tools

Delivery is supported by Accenture-developed assets and accelerators, including:

- Secure Cloud Reference Architectures tailored for restricted and air-gapped deployments
- Cloud Adoption Frameworks adapted for sovereign, classified, and disconnected environments
- Infrastructure-as-Code patterns and build accelerators aligned to Google Distributed Cloud
- Security and compliance control libraries supporting regulated delivery
- Platform operations playbooks for air gapped- lifecycle management
- DevSecOps patterns designed for offline or tightly controlled environments

These assets help accelerate delivery, improve consistency, and reduce delivery risk while maintaining alignment with client specific requirements.

5.0 About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organisations build their digital core, optimise their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 799,420 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities
