1.0 Scope of our services

Cloud adoption is assumed, it is not a question of if, but when. Traditionally, economic pressure, oversimplification of a migration and a piecemeal approach to cloud projects have led to unrealised business outcomes resulting in stalled or delayed cloud migrations. Migration to the cloud is a complicated journey and has many obstacles. Enterprises need to navigate the complex journey of planning, migrating and operating in a multi-cloud environment while maintaining their current business services. We help our clients at all stages of their journey to cloud. Our end to end spectrum of migration solutions can be tailored to the scale and scope of any transformation initiative while delivering consistent results. Accenture offers a holistic approach to migration with an end to end view that helps our clients swiftly and safely embrace the cloud, unlocking the powerful value of IT “As-a-Service” for their business.

Accenture’s journey to cloud encompasses Cloud Strategy, Assessment and Roadmap creation, Cloud Transformation and Migration and Cloud Management and Optimisation. We use our integrated capabilities and solutions to define, execute, manage and optimise each of our client’s Journey to cloud.

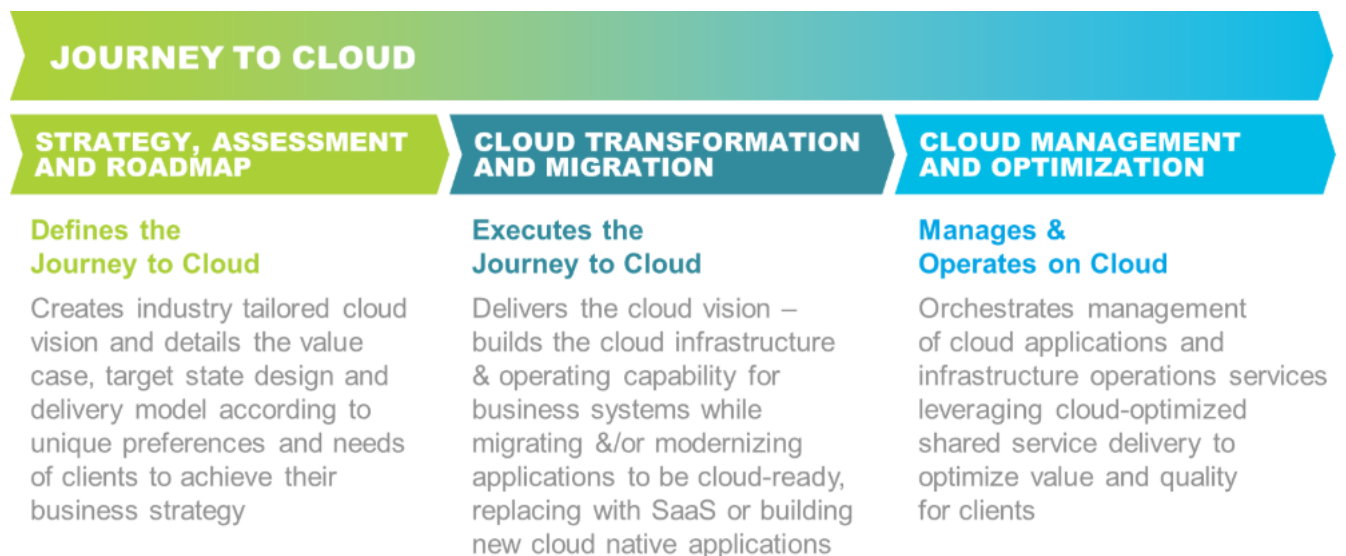

Figure 1: Accenture's Journey to Cloud Approach

Accenture Cloud Transformation and Migration Overview

Our cloud migration factories and certified experts work collaboratively with our customers and do the heavy lifting, so our clients do not have to worry about the complexity of migrating or building new cloud capabilities. Accenture’s automated tools and re-useable assets deliver cost controls, governance, accountability and consistent results for every cloud migration and transition.

Accenture's Cloud Migration & Transformation	SERVICES	OFFERINGS
	CLOUD JOURNEY MANAGEMENT	• Cloud Transformation Management • Release Management • Change Management & Communication • Program Quality Assurance • Security, Risk, and Regulatory Management
	CLOUD MIGRATION SERVICES	• Cloud Application Migration Program Management • Cloud Application Remediation Services
	CLOUD INFRASTRUCTURE TRANSFORMATION	• Rapid Cloud Application Migration Services • Private Cloud Implementation • Hybrid Cloud Network / SDN Implementation • Cloud Service Integration

Figure 2: Accenture's Cloud Migration & Transformation

Cloud Journey Management

Accenture's cloud journey management services provide the skills and capabilities to manage the complexity throughout transformation and execution – ensuring success whilst maintaining business continuity.

CLOUD TRANSFORMATION MANAGEMENT

Provides program management and governance functions, reporting and control.

PROGRAM QUALITY ASSURANCE

Provides assurance that components of the transformation are being executed in an appropriate way, to a level of quality which will deliver the desired business outcomes.

SECURITY, RISK AND REGULATORY MANAGEMENT

Helps clients manage risks and ensure compliance with relevant regulations as their organizations transition into the cloud.

RELEASE MANAGEMENT

Manages the initial & subsequent release management plan – including lines of business – to ensure that the dependencies between different initiatives are managed and the ability to continue to operate legacy is not impacted.

CHANGE MANAGEMENT & COMMUNICATION

Manages stakeholders and the transition of the technology organization to a new capability.

Figure 3: Accenture's Cloud Journey Management

Cloud Migration Services

Accenture's cloud migration services help our clients to plan and execute their transformation to cloud and preparing applications and systems for deployment to the target cloud platform. This can include remediating and re-platforming legacy services where appropriate.

CLOUD APPLICATION MIGRATION PROGRAM MANAGEMENT:

Services to plan and manage large, complex migrations.

RAPID CLOUD APPLICATION MIGRATION SERVICES:

Services to execute the migration of applications to the cloud using an accelerated approach of virtual to virtual and/or physical to virtual migrations that are highly automated and designed to move applications quickly.

CLOUD APPLICATION REMEDIATION SERVICES:

Services to remediate and re-platform applications, to modernize for cloud or cloud platforms, and prepare applications for deployment to the target cloud platform.

ACCENTURE'S CLOUD MIGRATION FRAMEWORK

Figure 4: Accenture's Cloud Migration Services

2.0 Approach

Accenture's Cloud migration framework is comprised of multiple stages with a defined set of inputs and outputs detailed at every stage. This includes Detailed Discovery, Application Assessment, Target Design, Release Planning, Remediation & Testing, Deployment Planning and Deployment execution. Through this rigorous approach we ensure a safe transition of your services to the cloud.

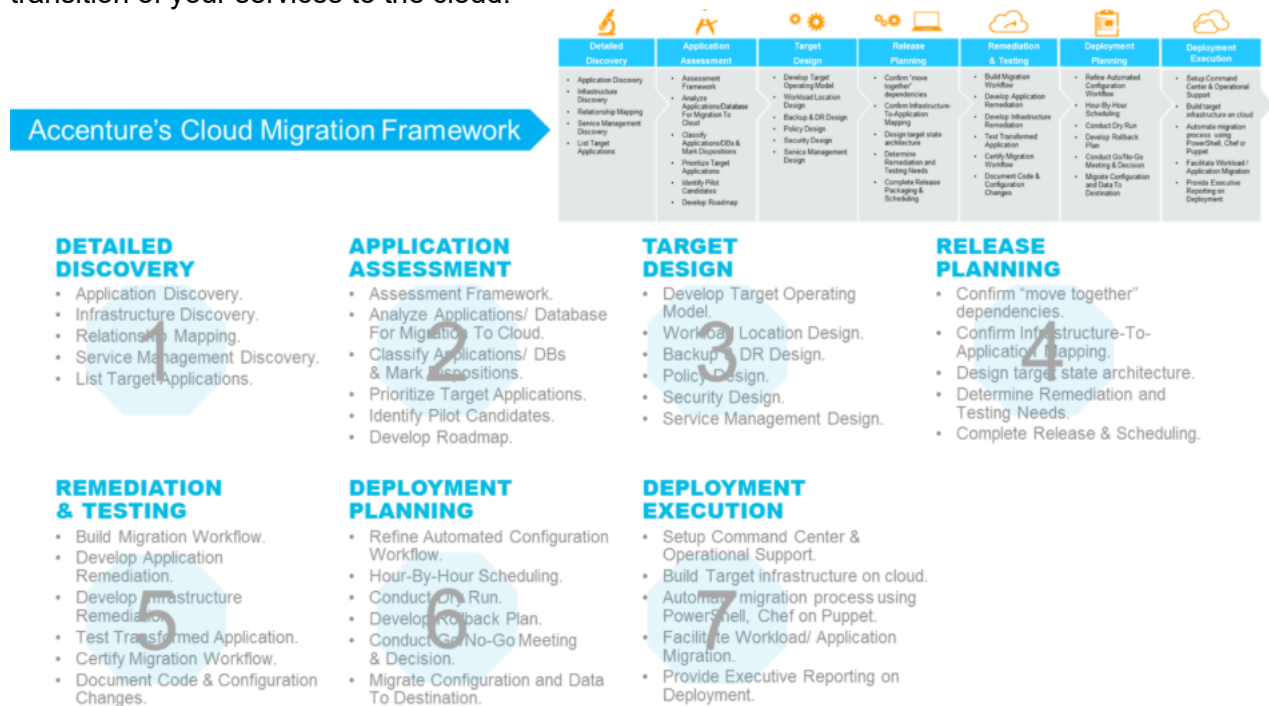

Figure 5: Accenture's Cloud Migration Framework

Accenture's Accelerate for cloud platform enables our migration methodology to be fully used at all phases of your migration programme, utilising a number of specifically designed Tools and Assets. This will enable you to automate recurring tasks, compress delivery timelines, and provide a single point of process control and visibility.

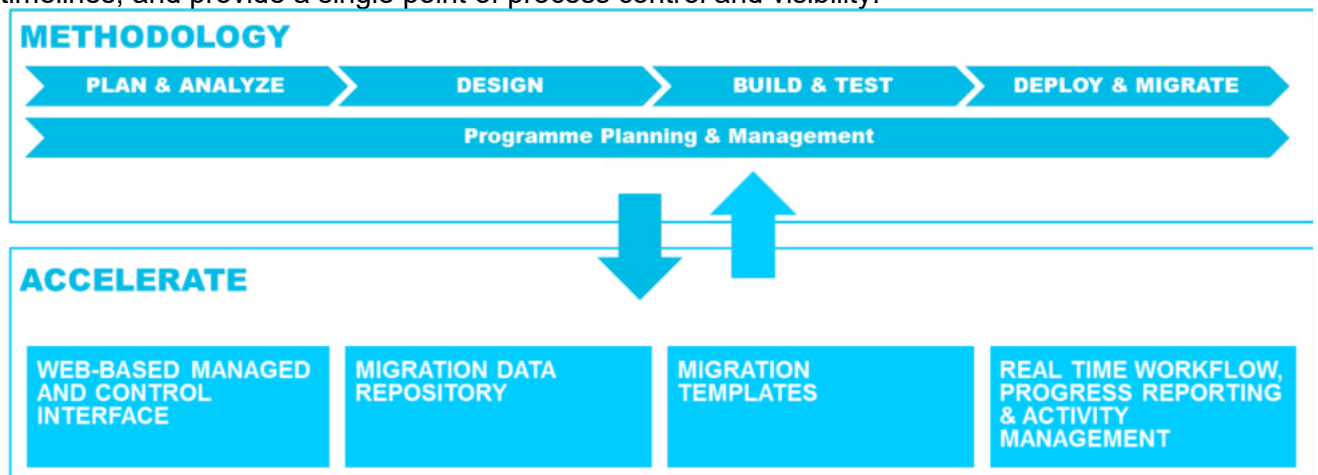

Figure 6: Accenture's Accelerate for Cloud

Cloud Migration Factory

Accenture has a global Cloud Migration Factory capability, utilising our dedicated resources from onshore (UK), nearshore and offshore. Our UK based Technology Centres are on the frontline and able to provide dedicated capability to enable our clients critical services to be migrated seamlessly, using Security Cleared resources where required. Our migration squads have access to our vast internal migration knowledge base, as well as assets and tools to de-risk and accelerate your migration journey. We use our strategic partnerships with the MAGs (Microsoft, AWS, Google) and other providers to enable access to the widest range of talent and capability, so you can be confident that your services and critical workloads will be migrated in a secure and timely manner.

Our capability extends beyond typical “Lift and Shift” migrations and extends into Application Modernisation, including containerisation and fully cloud native implementations. Accenture recognises that to access the full benefits of a migration to Cloud your workloads need to be Cloud ready, and we use our own full stack DevOps engineers to embed process and automation into all our Cloud deployments, creating reusable patterns and blueprints to enable standardisation and consistency in future build and deployment.

MIGRATION – DIFFERENTIATORS

Figure 7: Accenture's Cloud Migration Differentiators

We help our clients accelerate service velocity by moving from a traditional infrastructure to private or hybrid environment. Accenture delivers hybrid cloud solutions that includes seamless integration with our partners (Amazon Web Services (AWS) and Microsoft® Azure) public clouds to enable workload portability while retaining full visibility and control of infrastructure, applications, and data.

3.0 Assets and tools

Our Ecosystem

We focus prominently on hyper cloud providers: Microsoft, AWS, Salesforce, SAP and Oracle however we have strategic relationships with more than 150 alliance partners to help reduce risk, offering flexible matching of the right capabilities to a customer's needs, and speeding vendor evaluation.
