1.0 Scope of our services

Service introduction

AI Automation with Private LLM offers a robust suite of AI-driven automation tools designed to optimise your business processes.

Our service leverages private, secure Large Language Models (LLMs) to enhance your workflows without compromising data privacy. With specialised acceleration tools and APIs compatible with Sovereign Cloud, we streamline complex tasks, ensuring efficient and secure automation solutions tailored to your business needs.

Service features

- On shore security cleared team.
- Private LLM Usage: Utilises fully private LLMs to ensure all data remains confidential.
- Secure Automation: Implements rigorous security protocols to protect your workflows.
- Customisable Tools: Compatible with Sovereign Cloud offers tailored acceleration tools to fit specific business requirements.
- Integration-Friendly APIs: Provides powerful APIs for easy integration with existing Sovereign Cloud systems.
- Real-Time Analytics: Delivers insights and analytics from automated processes to drive decision-making.
- Sovereign Cloud scalable Solutions: Adapts to your business size and growth, from SMEs to large enterprises.
- Continuous Updates: Keeps systems up-to-date with the latest AI advancements.
- User-Friendly Interface: Ensures ease of use with a clear, intuitive interface.
- Experienced Team: Our expert Sovereign Cloud team have rolled out production AI solutions to over 400 users.

Service benefits

- Enhanced Efficiency: Streamlines operations, reducing the time and effort required for routine tasks.
- Cost Savings: Lowers operational costs by automating manual processes and reducing labour needs.
- Competitive Edge: Keeps you ahead of the curve by implementing the latest in AI automation technology.
- Data Security: Guarantees that sensitive information is processed within a secure, Sovereign Cloud private environment.
- Improved Accuracy: Reduces human error through precise, AI-driven automation.

- Scalability: effortlessly scales with your business, supporting growth without additional resource allocation.
- Innovation Promotion: Frees up resources, allowing your team to focus on innovation and strategy.
- Regulatory Compliance: Ensures compliance with industry-specific regulations through secure data handling.
- Customer Satisfaction: Enhances customer service by speeding up response times and improving service quality.

2.0 Service Implementation

Infrastructure Setup and Tooling (2 months)

Work with you to understand the MLOps Foundations and requirements. Select Sovereign Cloud compatible tools and ML frameworks from which to launch the service.

Model Development & Deployment (3 Months)

Develop custom and pretrained models using open-source AI with Python libraries. Design and deploy real-time APIs for model serving in the cloud and set up access and security.

Optimisation and Governance (2 months)

Establish secure protocols for drift, model tracking and model registry, and ensure regulatory compliance through comprehensive monitoring, audits, and risk reduction strategies.

Iterate (throughout)

Iterate throughout the process, developing using an agile methodology. We have a process of continuous handover so your teams can take ownership as the project is developed.

Key Differentiators

Private LLM Usage and Secure Automation with zero data leaks. Our workflow and privacy preserving automation brings customer workflow automation without new privacy risks.

Efficiency and Cost Savings our secure and private AI solution expands the range of automation solutions you can introduce, expanding the value of AI to your organisation in transforming customer experiences.

Industrialised AI delivering business value you can bank on. Our solutions move beyond POCs, helping you to productionise AI workloads bringing the trust, resilience and stability needed for you to automate your mission critical services.
