1.0 Scope of our services

The 835 solution provides an effective platform to deliver truly transformational access to Cerner Millennium data.

The 835 solution was originally developed in partnership with the Lewisham and Greenwich NHS Trust

(LGT) as an operational data source for Theatre dashboards and A&E reporting. Since its introduction, it has been expanded across all administrative and core clinical datasets, and successfully rolled out across a number of hospitals Trusts as an intelligent platform for analytics, discharge reminders, maternity screening, patient flow, and more.

Key Benefits

 ACCURATE Direct data feeds from Cerner Millennium.	 SECURE AND EFFICIENT Transformation of existing Cerner data reporting.	 INCLUSIVE Near real time unlimited and immediate access.	 ADAPTIVE Universal data compatible with leading reporting platforms.
---	---	--	---

No other wholly functioning solution is available on the market; The 835 solution is guaranteed technology tried and tested with the greatest data scope and the fastest impact.

The 835 solution takes direct data feeds from Cerner Millennium onto an industry standard Microsoft SQL server platform at the Trust. It is within a few minutes of the live Millennium system – providing ‘near to real time’ data.

Don’t wait a day to see the impact of your work, within minutes the 835 solution can provide visibility for reporting, analysis and operational dashboards. It works on Industry standard architecture consisting of staging areas, data marts/cubes and reports. It removes the dependency upon PIEDW and provides transparency of data flowing from the Millennium online solution into analytics, dashboards and the data warehouse.

FEATURES

- Industry standard architecture consisting of staging areas, data marts/cubes and reports.
- Audit trail of data flowing from Millennium online solution into reports.
- Progressively adds and updates Data marts with input from end-users and Trust transformation teams.
- Designed to be flexible so as to support definition changes in an AGILE fashion rather than a prolonged software development and release cycle.
- Supports use of real-time applications - Mobile Clinical Portal, Patient Flow management, and sameday SMS for Friends and Family Test

835 FEATURE LIST BASE PRODUCT

Emergency Department/ A&E

Provides a comprehensive reporting capability from senior managers to data administrators via a single trusted data source.

Theatres

Data Mart and reports supporting past activity analysis and utilisation measures plus forward look views to aid planning.

RTT

A single repository complementing front-end Millennium tools to aid tracking of RTT pathways and quickly identify previous and next events on that pathway.

E-discharges

A single tool to aid real-time monitoring of the status of discharge summaries and enable analysis of service/ward/clinician compliance.

Inpatients

Facilitates near real-time analysis of Consultant Episodic and Ward Stay data.

Outpatients

Referrals & appointments, Availability and utilisation of outpatient slots.

MED

MED (Meds Prescribing and Administration).

Demographics

Patient Details.

Waiting Lists

Inpatient and day case referrals and Waiting List data management along with Millennium Request Queues and future orders.

Clinical Docs

PowerForm based repository of Forms, Sections and the responses recorded.

Orders & results

Reporting capability for monitoring of orders placed, the encounters associated to them and the results received back into Millennium.

Maternity

A monitoring tool for ante-natal tests and their status. A consolidated view of data captured in Millennium administrative, iView and PowerForm modules.
