1.0 Scope of our services

Service introduction

Our Sovereign Data Platforms, Strategy to Implementation Service offers an end-to-end solution for deploying cloud-based data platforms. From strategic planning through to implementation, we design, review, and manage architectures that fit seamlessly into your digital landscape.

Leveraging our extensive experience, we ensure successful new builds and migrations from on-premises or other cloud services and can do so on estates of any size or complexity.

Service features

- On shore security cleared team.
- Advanced Platform Development: Delivery of next-gen, cloud-based data platforms integrated continuously.
- Architectural Excellence: Comprehensive architecture and design services, including ongoing management and review.
- Data Science Integration: Incorporates sophisticated analytics and data science capabilities.
- Modern Data Handling: Uses containerisation for data pipelines and microservices.
- Dynamic Data Migration: Ensures smooth data migration with real-time data acquisition capabilities.
- Robust Security Measures: Implements strict data security protocols, along with continuous monitoring and tuning.
- Cost-Benefit Transparency: Clear articulation of dependencies, costs, and benefits for informed decision-making.
- Agile and Structured: Adopts a structured yet flexible approach to agile delivery.
- Data Assurance and Quality: We bring our experience and tooling to assure quality on complex cloud native datasets in modern platforms

Service benefits

- Enhanced Insights: Gain deeper business and customer insights to drive decisions.
- Faster Data Access: Achieves rapid data acquisition and querying capabilities.
- Streamlined DataOps: Provides an efficient service for managing data operations.
- Advanced Analytics: Utilises machine learning and AI to identify opportunities, detect anomalies, and monitor trends.
- Optimised Costs: Reduces platform costs and minimises maintenance expenses.
- Scalable Solutions: Improves forecasting abilities and adapts to changing demands.

- Compliance and Security: Ensures regulatory compliance and secures data across all processes.
- Cloud Efficiency: Leverages commodity cloud services, open standards, and open-source resources for enhanced flexibility and innovation.
- Trusted Data: Our data quality and assurance tools are built from the ground up to fit into cloud architectures

2.0 Service Implementation

Foundation & Design: (2-3 months*)

Work with you to understand the existing data estate, and gather requirements, do the strategy, the design and the architecture.

Foundation & Design: (2-3 months*)

Work with you to understand the existing data estate, and gather requirements, do the strategy, the design and the architecture.

Scaling & Optimisation (2-3 months*)

Implement the solution on live flows in pre-prod then monitor, plan and optimise for performance, and service scalability.

Deployment & Improvement (2-3 months*)

Deploy to production, monitor, and iterate for continuous improvement. Work with consuming systems to integrate with downstream services.

** assumes up to 15 low to medium complexity datasets*

Key Differentiators

Delivering lasting value from our deep expertise in Data Platforms

At the heart of what makes us different is our reference architecture.

Our reference data platform architecture specifies the business requirements we get asked to deliver time and time again. We use this to ensure we cover off all the bases, de-risking your programme

Data Integration is at the heart of all our platforms helping to fuse data from across data sources. Our bespoke probabilistic match engines can drive value across your data estate.

The ability perform in-depth impact studies of how changes to the data platform will impact every data feed, ETL job and consumer system allows us to react to planned (or unplanned!) change quickly.

3.0 Pricing

Please refer to the associated pricing document/ rate card relevant for this service.

5.0 About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organisations build their digital core, optimise their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 799,420 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities
