1. Overview

Clinical Patient Management (Adastra) is a patient case management system used in emergency care settings. Clinical Patient Management provides users with the tools needed to manage patients and supports the correct course of treatment, whether that is a referral to their GP or dispatching an ambulance to take them to hospital. It ensures clinical handover is seamless and all records are updated.

2. Software Modules

The following modules are standard with Clinical Patient Management

2.1. Functionality

- Full Hosting Solution
- NHSE CIS2 Compliant
- Multi-Factor Authentication
- Case Entry / Online Clinician
- PDS Lookups
- Directory of Service Integration (DoS)
- Summary Care Record
- Pathways / PaCCS Compatibility
- Emergency Care Summary (Scotland Only)
- Welsh Demographics Service
- Case Despatch Tracking
- Appointment Booking
- InApp Reporting
- ITK Compliant
- Stock Control / Formulary Management
- Active Performance Management
- Local Agency Referral
- Special Patient Notes (ACI Index)
- Comfort call service module
- E-Mail
- Guided Transfer
- Case Question Sets
- Rotas

- Office 365 Compatibility
- 26 x Standard Clinical Templates
- Prescribing
- Instant Messaging
- Remote Session Termination
- Click to Dial
- Weblink Supports

2.2. Parameters

- Clinical Patient Management can be purchased for any number of concurrent users

2.3. Excluded / Out of Scope

- Professional Services
- Optional Modules

3. Optional Modules

There are several optional modules that can be purchased with Clinical Patient Management:

- APIs
 - Patient Demographics API
 - Incoming Case Request API
- Telephony APIs
 - Natural Language Processing API
 - Virtual Waiting Room APIs
- Clinical Patient Management Web Access
- SMS
- Address Lookup (including UPRN)
- Clinical Decision Support (Odyssey)
- Video Consultation
- Patient Care Advice SMS
- AnyConnect (GP Connect / Care Connect / BaRS)
- Label Trace

- Right to be forgotten

9. Platform and Security

We power the world of work through our sector-focused software, bringing together mission critical **workflows** and a unified **user experience** that connect your organisation.

All underpinned by our **Delivery Platform** - offering scalability, security and connectedness by providing shared services such as cyber security, data analytics and AI innovation.

USER EXPERIENCE

A common user experience and persona-based analytics, reporting and dashboards means ease of adoption across your organisation.

WORKFLOW APPLICATIONS

Connected, sector specific, workflows mean you'll have a smarter data driven user experience with user specific tools.

DELIVERY PLATFORM

Secure and scalable services for real connectedness. Cloud services for cyber security, user governance, API and integration management, a data layer and ethical AI and Machine Learning.

PLATFORM TECHNOLOGY – SYSTEMIC DELIVERY

Our platform is built for scalability, security and connectedness: with key components designed to enrich our Sector Portfolios. The platform embeds critical components, such as identity & access management, a common user-experience and API management into our Sector Portfolios with a systemic “build once, deploy many times” methodology.

SECURITY

System security by design with strict policy enforcement through automation. Integrated & proactive threat monitoring and intelligence.

Fully encrypted end-to-end environment

Protect data at a **user, department or organisational level**

Customisable, including whether you want your chats remembered or not

Private Spaces enable you to share and collaborate around role, team or organisational data in a **private and secure environment**

Manage and control usage – seamless access across OneAdvanced Portfolios

Single sign on – providing security and convenience for the end user accessing all OneAdvanced solutions

OneAdvanced Platform controls usage

OneAdvanced meets the requirements for the following accreditations:

- **ISO 27001:** The international standard for information security.
- **Cyber essentials plus:** The highest level of certification offered under the Cyber Essentials scheme.
- **ISO 42001:** The international standard for establishing an Artificial Intelligence Management System (AIMS), providing a framework for organizations to develop, use, and maintain AI responsibly, addressing risks, ethics, transparency, and compliance.

SAFE. TRUSTED. SECURE

Our platform drives scalability, security, and seamless connectivity, serving as the foundation for our software. It unifies workflows across your organisation, ensuring the tasks you need are completed efficiently. Now enhanced with next-generation AI capabilities, it enables independent, adaptive problem-solving to tackle challenges with precision.

INTRODUCING THE ONEADVANCED TRUST CENTRE

Trust Centre

At OneAdvanced we understand that trust isn't given; it's earned. That's why we're launching our Trust Centre, a centralised online resource designed to make it easier for

businesses to partner with us confidently. We've built this platform with your needs in mind, ensuring transparency, reliability, and clarity in every aspect of what we do. UK businesses are grappling with significant data and AI challenges. With 71% of organisations reporting data breaches and 63% targeted by cyber-attacks, the demand for stronger protection measures has never been more urgent. Furthermore, 60% of businesses now view AI as a high or critical risk, with data security standing as a key concern.

The Trust Centre is our solution to tackling these challenges head-on. Designed to provide a secure, transparent framework, it helps businesses effectively manage risks related to data and AI.

Our mission is clear: to Power Your World of Work. The Trust Centre marks a vital step forward in that journey - offering you fast, reliable access to the information you need to evaluate OneAdvanced with confidence.

WHY TRUST MATTERS MORE THAN EVER

Trust is a critical currency in today's fast-paced, digital-first business environment. From customers to partners, businesses expect their suppliers to demonstrate accountability and provide transparency on how they manage data, ensure compliance, and maintain robust security measures.

Achieving data protection and AI compliance can be a daunting task, requiring significant time, resources, and budget. In fact, nearly a quarter of UK businesses cite budget constraints as their biggest security hurdle. To address this challenge, we've made a substantial investment in cutting-edge tools, streamlined processes, and dedicated resources, so you can focus on what matters most – your business – without shouldering the burden of costly compliance alone.

With the launch of the OneAdvanced Trust Centre, we're delivering a comprehensive solution to address your questions, streamline information access, and ensure you stay informed with the latest updates.

A COMMITMENT TO EARNING YOUR TRUST EVERY DAY

At OneAdvanced we believe trust is not a one-time achievement but an ongoing responsibility. We'll be continuously updating the Trust Centre to include the latest certifications, evolving industry standards, and fresh resources, ensuring you're always equipped with the most relevant and accurate information.

Our goal is to empower your organisation to make informed decisions and innovate with confidence, knowing that OneAdvanced is a reliable partner committed to your success.

Please see OneAdvanced's [Trust Centre](#) for more details.

9.1. OneAdvanced AI

Introducing **OneAdvanced AI** - a private, secure AI service for role, organisation and sector specific work in UK organisations. OneAdvanced AI is designed to support customers who are looking to adopt AI but have privacy concerns and skill/knowledge limitations around AI.

UK hosted AI Service ensures that your data stays on UK soil, ensuring compliance with local regulations

Business-grade, **customisable, privacy controls** allow you to set permissions by user, function or organisational level

Secure AI for business. Built to give companies confidence in AI adoption without compromising security

Features include:

- UK-hosted, private, AI service
- Identity management controlled by the organisation
- Unified user experience (WCAG 2.2 AA compliant)
- Privacy controls set by user
- Secure personal environment for file upload and storage
- Reasoning AI to show logic process of conclusions, analysis and answers

We're redefining AI for business - **safely, securely**, and with real results.

Protect your data: Our UK-based hosting ensures that your data remains in the UK, under your control and in compliance with local regulations.

Work privately: Our private spaces allow you to upload files to a secure environment. Bringing the power of AI to your documents without compromising on security.

Enhance productivity: Our Retrieval-Augmented Generation technology combines data sources to enhance work, making it easier to complete tasks and achieve goals.

10. Introducing OneAdvanced

OneAdvanced is the UK's third largest provider of business software and services with a £330m turnover, 10,000 customers and 1,800 employees. We provide enterprise and market-focused solutions that allow our customers to reimagine what is possible, innovate in their sectors and improve the lives of millions of people in the UK.

OneAdvanced solutions help to care for 65 million patients in the UK, send 10 million sports fans through the turnstiles, manage over £1 billion in charity donations, support 2.5 million students and get over 1.2 billion passengers to their destinations on time. By continually investing in our people, partnerships, and technologies, we provide right-first-time solutions that evolve with the changing needs of our customers and the markets they operate in.

We are more than just a software company. We **power the world of work** for our customers. Read more about us including information surrounding our culture and values [here](#).

ESG

Our Bettering Society ethos is at the heart of the way we do business. We are committed to leveraging our solutions to provide a brighter future for everyone, improving our societal impact and engagement. We achieve this across the four pillars of our ESG Strategy.

Our purpose is clear: to create a fairer, more inclusive society through the power of our people and our software by 2030. At the heart of this is our Bettering Society ethos - our guiding principle that shapes everything we do.

- **Better for the Planet** – by working with communities to reduce inequalities and empower more people to make climate-conscious choices.

- **Better for our People** – by breaking down barriers to career opportunities and creating pathways for meaningful, inclusive growth.
- **Better Technology** – by delivering solutions that drive positive outcomes for our customers, their people, and the wider communities they serve.
- **Better Business** – by upholding ethical, responsible, and compliant practices that reduce inequality and promote long-term trust.

Our ambition is to embed sustainability and integrity into every aspect of our business. We are investing in transformative technologies and strategic partnerships that accelerate our impact, while maintaining accountability through transparent reporting and meaningful stakeholder engagement.

Discover how OneAdvanced AI delivers trusted, UK-hosted AI solutions with a focus on sustainability, fairness, and accessibility through our [AI ESG Statement](#).

OneAdvanced has also made a commitment to transparency and accountability, publishing an annual Societal Report that outlines its progress towards its ESG goals. Please see [OneAdvanced 2024 Societal Report](#).
