1.2. Trial Periods

Trial periods are not typically offered but can be agreed on a case by case basis. Proofs of concept are more typically offered, subject to detailed plans, agreed objectives, and post period reviews to determine ongoing service status. This is not typically offered on a free of charge basis.

1.3. Exit Costs

OneAdvanced charges for the Exit Process because customer generated content is returned to the customer, to an alternative supplier at the customer's request and/or listed and/or certified as destroyed upon termination. OneAdvanced charges for these services on a time and materials basis, at rates that are in accordance with the Services Day Rates below.

OneAdvanced services available on termination include (and are subject to the data standards that will be in use (within the service) at the time of termination):

The return of all consumer-generated data (e.g. content, metadata, and audit) and a list of the data that will be available for extraction. Where there is a risk of confusion, data that will not be available for later extraction will also be published. By default, data will be provided as a data extract in a SQL database.

Extraction of consumer generated data in a specific format (or the migration to another service provider's service) can be discussed as part of the exit plan along with any associated costs that may apply.

Confirmation that the Supplier will purge and destroy (as defined in security accreditation for different ILs) consumer data from any computers, storage devices and storage media that are to be retained by the Supplier after the end of the subscription period and the subsequent extraction of consumer data (if requested by the consumer).

Data will be extracted on exit and delivered to the consumer in a pre-agreed form and on a pre-agreed medium. Generally, the data is extracted as a direct copy of the original environment and delivered on portable disk media or SFTP download. Data is construed as including the content, structure, configuration and meta data information for applications and services.

The only element of the SaaS environment that will not be delivered is the operating system and associated license keys.

On exit, all consumer data will be retained within the backup environment for a period of 30 days, unless specific requests are made otherwise, after which it will be destroyed and all associated server environments within the IaaS will also be destroyed.

1.4. Education or Research Establishment Pricing

OneAdvanced does not offer specific sector pricing for Education or Research establishments. The Pricing defined represents a common model for all participating bodies.
