1 Introduction

Agilisys is a leading innovator in AI-enabled Software-as-a-Service (SaaS) solutions for the UK public sector. With over two decades of experience supporting local authorities, central government, healthcare, and emergency services, Agilisys leverages advanced artificial intelligence and cloud technologies to deliver transformative outcomes across a wide range of services.

Our commitment to continuous innovation empowers public sector organisations to modernise operations, enhance service delivery, and meet evolving regulatory and operational challenges. By combining deep domain expertise with cutting-edge digital platforms, Agilisys enables clients to unlock new efficiencies, improve citizen experiences, and build resilient, future-ready organisations.

2 Who this Service is For?

This service is designed for UK public sector organisations- including local authorities, NHS, and government agencies seeking to empower their staff to automate and streamline workflows directly. Agilisys Platform's secure, web-based portal allows end users to create, deploy, and share AI-driven automations, making it ideal for teams handling high volumes of documentation, compliance tasks, or administrative processes, and for those looking to drive efficiency and innovation across organisational boundaries.

3 Agilisys Platform - an overview

The Agilisys Platform provides a cloud-based, AI-driven automation solution that enables users to perform complex tasks such as generating reports, extracting insights, and producing summaries at the click of a button. Through its secure, intuitive web portal, end users can build and deploy automations tailored to their needs, then share these automations so they can be reused across teams, departments, and directorates.

This approach ensures that best practices are embedded, and outputs remain consistent and reliable, regardless of who initiates the process.

4 Service Description

Agilisys Platform is a robust, cloud-based automation engine that leverages generative AI to streamline and accelerate knowledge work. Users interact with a secure, user-friendly web portal to upload documents, data, or prompts, and Agilisys Platform processes, summarises, and generates outputs tailored to specific use cases.

End users can design and publish their own automations, which can then be shared and reused across the organisation, delivering consistent, high-quality results and reducing duplication of effort that enable you to scale use cases and productivity enhancements across functional areas.

Key features include:

- Secure, intuitive web-based portal for end-user automation
- One-click generation of summaries, reports, and analyses
- Sharing and reuse of automations across teams, departments, and directorates
- Built-in audit trails and citation features for transparency and compliance

- Support for a wide range of document types (Word, PDF, scanned images, etc.)
- Private workspaces, prompt sharing, and scalable deployment

5 Onboarding and Offboarding

Agilisys provides a structured onboarding and offboarding process for clients seeking to transition services into or away from Agilisys Platform. As a Cloud-based SaaS model we can deploy and scale the service rapidly.

5.1 Onboarding

Our implementation model begins with a three-month Evaluation Licence, providing full system setup, configuration, training, and live customer success support at no additional charge.

During this period, users receive hands-on onboarding and participate in monthly feedback huddles to monitor progress and capture insights. A pre-trial success criteria session, mid-point review, and post-pilot evaluation ensure measurable outcomes, supported by a detailed business case demonstrating time and cost savings.

This approach enables rapid service mobilisation while provide support in making best use of the tool for your team.

- Structured onboarding process, including system setup, configuration, training, and live customer success support.
- Three-month Evaluation Licence offered, with full configuration, onboarding, and support at no additional charge.
- Monthly feedback huddles, pre-trial success criteria session, mid-point review, and post-pilot evaluation ensure measurable outcomes.
- Dedicated Customer Success Team supports implementation and sustained adoption.

5.2 Offboarding

When transitioning out of our service, Agilisys ensures a secure and orderly handover to the client's internal teams. Client data retained within Agilisys systems is securely deleted in accordance with our data governance policies.

Upon request, we provide formal confirmation of data destruction. Our offboarding process is designed to preserve service integrity, maintain compliance, and support a smooth transition with minimal operational impact.

6 Support

Our support, service provides core business hours support (09:00–17:00, Monday to Friday).

- Comprehensive, tailored training, onboarding support, and ongoing customer service.
- Structured onboarding and training programme, supported by dedicated Customer Success Team.
- Ongoing technical support and customer service available 09:00–17:00, Monday to Friday (UK time), with best-effort coverage outside these hours.

Additional customisation and implementation support in addition to that provided during onboarding can be obtained through our Professional Services practice, the Rate Card for these services is available in the accompanying Pricing Document.

7 Pricing

Pricing is based on the specific service requirements, service levels, scale and scope of services provided in the accompanying pricing document for this G-Cloud service.

- Transparent, all-inclusive pricing model based on a minimum of 500 runs per month and then the number of Agilisys Platforms processed per month.
- Subscription fee includes configuration, onboarding, training, ongoing support, hosting, maintenance, and upgrades.
- No additional or hidden costs for training, implementation, support, or future system updates.
