SharePoint Cloud Deployment and Migration Services

1 WHAT THE SERVICE IS

Leidos offers a full end-to-end collaboration service, delivering Microsoft SharePoint based solutions and consultancy aligned with your cloud or hybrid cloud strategy. Our experienced in-house team of SharePoint professionals includes user engagement and research, discovery, agile development, configuration, customisation and integration.

FEATURES

- Proven record in the design/development/deployment/support of SharePoint and SharePoint Online;
- Full configuration/customisation of SharePoint including bespoke integration and feature development;
- Delivery across Cloud-based environments using Azure and Office 365;
- Project Methodology - Define, design, develop and deploy;
- Method of Engagement - Full end-to-end service delivered on/off site;
- External users, including 3rd parties, can share/collaborate securely on sites/folders/documents;
- Information architecture supports customer information management policy;
- SLAs tailored to customer needs;
- Training provided as part of our Information Management offering;
- Social interaction via implementation of MySites, blogs and noticeboards;
- No Service constraints on maintenance windows, level of customisation, etc.

BENEFITS

- Requirement gathering and translation into a cost effective solution;
- Maintainable, extensible and scalable solutions through selecting the correct architecture;
- Drive insights using business intelligence leveraging SharePoint and the Microsoft stack
- Drive added value using custom applications such as workflow conversion.
- Integration with Multiple Microsoft and 3rd party products;
- SharePoint can be accessed online from anywhere;
- Secure service including health checks, analysis of existing SharePoint provisions;
- Flexible upgrades and migrations between SharePoint instances and versions;
- Avoid technical debt and platform obsolescence through the rolling release.
- Reduce time to value with configured instances using customised or OOTB applications.

OVERVIEW

Leidos offers comprehensive SharePoint Cloud Deployment and Migration Services, providing a full suite of solutions and consultancy tailored to support your cloud or hybrid strategies. Our expert team of SharePoint professionals ensures a seamless transition and integration of SharePoint environments, whether in the cloud using Azure and Office 365, or through hybrid setups, ensuring that our solutions are in perfect alignment with your business needs.

Our end-to-end service spans from initial user engagement and discovery through to agile development, configuration, customisation, and integration, delivered either on-site or remotely. This holistic approach guarantees a secure, scalable, and maintainable SharePoint environment that enhances collaboration across all levels of your organisation.

By partnering with Leidos, you benefit from rapid deployment and customised solutions that reduce time to value, driving business insights and added value through enhanced business intelligence and custom applications. Our tailored SLAs, extensive training offerings, and continuous support and upgrades ensure that your SharePoint solution remains state-of-the-art, adaptable to new challenges and opportunities as your business evolves. With Leidos, transform your information management capabilities into a strategic asset that supports broader business objectives and delivers measurable results.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.
