Internal Vulnerability Assessment Service

Service Definition Document

Internal Vulnerability Assessment Service

1 WHAT THE SERVICE IS

Despite the dramatic increase in cyberattacks and the glaring risks of being breached, few organisations have been able to invest sufficiently in the cybersecurity staff and tools necessary to effectively defend their enterprises 24x7x365.

FEATURES

- Determine the effectiveness of cyber threat defences.
- Fully customised delivery to meet your individual needs.
- Highly experienced analysts performing relevant and innovative testing.
- Detailed reporting and trend analysis.
- Prioritised remediation report.
- No false positives, all results manually validated.
- Secure appliance connecting to secure service locations over VPN/SSH.
- OWASP top ten and threat intelligence.

BENEFITS

- Understand the risk your internal infrastructure poses.
- Validate your security controls, policies and procedures.
- Risk assurance through use of experienced cyber security analysts.
- Detailed, Intelligent near real-time reporting and statistical analysis.
- Flexible: Both on-demand and scheduled regular testing available.
- Improvement security posture.
- Mitigation of risk of malicious actions or compromise.

OVERVIEW

Strengthen Your Cyber Defences, Save Cost and Improve Efficiency

Advanced Managed Security Services (MSS) from Leidos enable organisations to proactively monitor their enterprise while saving cost and mitigating risks. Through a combination of advisory services and sophisticated platforms and tools, our MSS provides protection across the spectrum of an effective cyber defence programme. We collaborate with your organisation to develop a proactive plan that minimises vulnerabilities, prioritises threats, and refines security processes to deliver better visibility and control of information security risks. From anticipating events to detecting attacks and responding to incidents, Leidos helps protect your critical assets and data.

Leidos Difference: Critical Experience and High Touch Approach

With our experience and high touch approach your team saves time and manpower investigating events and improves efficiency and cyber posture. Leidos advanced MSS provides:

Experience You Can Trust

- We combine decades of national security experience with deep commercial expertise to protect organisations from all verticals.
- We have more than 35 years of providing cybersecurity solutions, including 17 years running Security Operations Centres (SOCs).
- We not only provide MSS for leading organisations, but also Fortune 500® companies and prominent federal agencies

High Touch Approach That Reduces Ticket Fatigue

- We follow best practices by applying the power of human intelligence to 24x7x365 monitoring, including validation of all alerts.
- We provide client specific, signature-based alerts and escalations that include event detail and actionable recommendations.
- We assign a cyber engineer and project manager to each client.
- Applied Threat Intelligence to Help Mitigate Risk
- We proactively apply intelligence and share insight found across multiple market segments.
- Our proprietary threat investigation intelligence repository provides detail on resolution to 15+ years of events.
- Our cyber analysts actively hunt for attackers and threats.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.

3 PRICING
