Cloud Build Service

1 WHAT THE SERVICE IS

Leidos will deploy your cloud platform (AWS, Azure, multi-cloud, hybrid, on-prem) and all migration and management services using automated tooling from validated Infrastructure and configuration as code. Your platform will be rigorously tested and accredited (if required) before it is certified fit for service prior to workload / application migration.

FEATURES

- Cloud agnostic: Leidos can deploy to any hyperscale cloud provider
- Automated deployment based on reusable, validated, best practice aligned patterns
- Landing Zone incorporates cloud native and third party tools
- SecDevOps development of Infrastructure and Configuration as code with CI/CD
- Integration of Financial Operations (FinOps) from outset / by design
- Automated and manual testing assures readiness for production use
- Multi-cloud, hybrid and private cloud deployment
- Experienced, qualified and accredited UK / onshore Architects and Engineers
- Service Management, security Identity and IAM, PKI integrations and account structures incorporated
- Launched cloud platform handed to Leidos support team immediately

BENEFITS

- Flexibility: Choice of cloud platform based on suitability or preference
- Fast deployment accelerates cloud migration project and reduced overall cost
- Risks minimised through use of validated IaC/CaC
- Secure by design and in delivery based on the requirements
- Centralised billing and account management eases administrative overhead
- Rapid platform availability: focus on business value achieved through migration
- Constant platform evolution leveraging newly launched and innovative technologies
- Flexibility through integration of IaaS, PaaS, containers, serverless and SaaS
- Observability: auditing, monitoring, alerting, service management and SIEM integration

OVERVIEW

Leidos delivers a comprehensive Cloud Build Service, meticulously designed to deploy your cloud platform—whether AWS, Azure, multi-cloud, hybrid, or on-prem. This service encompasses all aspects of migration and management, utilising advanced automated tooling from validated infrastructure and configuration as code. Prior to any workload or application migration, your platform undergoes rigorous testing and accreditation to ensure it is fully optimised and certified fit for service.

Our service features state-of-the-art deployment capabilities, including cloud-agnostic approaches and automated deployments using reusable, best practice-aligned patterns. With a robust integration of financial operations from the outset, and continuous development using SecDevOps principles, we guarantee a deployment that is not only fast and efficient but also meticulously aligned with your business needs and security requirements.

Choosing Leidos means opting for a cloud solution that offers unparalleled flexibility and rapid deployment capabilities. This accelerates your cloud migration projects, including AI projects, while reducing costs and minimising risks through the use of validated infrastructure as code (IaC) and configuration as code (CaC). Our approach ensures that your platform is secure by design, with comprehensive service management and security integrations. The immediate handover of the launched cloud platform to the Leidos support team ensures continuous oversight and evolution, leveraging the latest technological innovations. With Leidos, you gain a cloud solution that is not just functional but transformative, allowing you to focus on deriving maximum business value from your cloud investments.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements in order to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.
