Security Architecture Review Service

1 WHAT THE SERVICE IS

The Security Architecture Review Service is a structured evaluation of an organisation's security design across on-premises and cloud environments. It ensures that architectural components align with industry standards, regulatory requirements, and best practices, identifying weaknesses and recommending improvements to enhance resilience, compliance, and security-by-design principles.

FEATURES

- Comprehensive architecture assessment for hybrid environments.
- Compliance validation against global security standards.
- Identity and access management review.
- Data protection and encryption analysis.
- Threat modelling and risk assessment.
- Cloud security posture evaluation.
- Actionable remediation recommendations

BENEFITS

- Improved security posture and reduced risk.
- Regulatory compliance assurance.
- Enhanced operational resilience across on-prem and cloud.
- Strategic alignment with Zero Trust principles.
- Cost efficiency through proactive risk mitigation.

OVERVIEW

The Security Architecture Review Service employs a rigorous, business and risk-focused methodology to comprehensively evaluate the organisation's security architecture in both on-premises and cloud settings. This service verifies that architectural design principles, configurations, and integrations align with industry best practices, regulatory requirements, and organisational security objectives. It also identifies potential architectural weaknesses, evaluates the effectiveness of implemented security controls, and provides actionable recommendations to strengthen resilience and support compliance efforts.

Through the integration of rigorous security-by-design principles within enterprise architecture, this service proactively mitigates risk by identifying potential vulnerabilities and misconfigurations. It ensures that the organisation's security posture is robust and aligned with leading frameworks such as ISO 27001, NIST CSF, and Zero Trust. This methodology supports comprehensive governance and technical assurance for strategic initiatives, forming a solid foundation for sustained compliance and operational resilience.

Purpose

- Embed security-by-design principles into enterprise architecture.
- Reduce risk exposure by identifying vulnerabilities and misconfigurations.
- Ensure alignment with frameworks such as ISO 27001, NIST CSF, and Zero Trust.
- Support governance and technical assurance for strategic initiatives.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.

3 PRICING

Please refer to the associated Pricing Document relevant to this Service.

4 TERMS AND CONDITIONS

Please refer to the associated Terms and Conditions Document relevant for our Service Offerings.

5 FURTHER INFORMATION

Please send your requirement to publicsector@uk.leidos.com. Alternatively, if you wish to discuss your requirements in more detail, please send us the following information and we will be happy to contact you:

1. Your organisation name.
2. The name of this service.
3. Your name and contact details.
4. A brief description of your business situation.
5. Your preferred timescales for starting the work.

ABOUT LEIDOS

Leidos is a leading partner to the UK government and the Scottish government as well as having key client partners in transportation and energy. Leidos employs 1300 people across the UK supporting technology and business process transformation programmes for clients such as the Home Office, the Ministry of Defence, the Metropolitan Police Service and NATS.

The success of this work in the UK and beyond shows that we are a trusted partner in the region and that our people can deliver innovative solutions to solve the most challenging problems.
