Data Visualisation and Reporting Service

1 WHAT THE SERVICE IS

Leidos' service delivers reporting capabilities, business insights and enables the gathering, communication and visual representation of customer's data. This is delivered in a centralised, secure gateway that customers can use to share access to their data assets, dashboards, enterprise reporting, BI, or as part of new/existing customer solutions.

FEATURES

- Providing Centralised, Secure Gateway for Data Access;
- Delivering Dashboarding solutions aligned to customer needs;
- Expertise in Enterprise Level Reporting (cloud and hybrid platforms);
- Design and implementation of Ad-Hoc reporting solutions;
- Delivering of Real-Time Reporting for better decision making and transparency;
- Consultancy and Delivering of Immersive Data Storytelling experiences;
- Design and implementation of Online Analytical Processing (OLAP) solutions;
- Providing Business Intelligence (BI) services to enhance customer analytics experience;
- Geospatial data analysis using intelligent visualisation and reporting techniques;
- Implementing Chatbots and conversational interfaces to improve interaction and delivery of services;
- Enabling self-service reporting with intuitive, no-code visualisation tools;
- Delivering mobile and responsive reporting solutions for access anytime, anywhere;
- Integrating predictive and advanced analytics into reporting for forward-looking insights;
- Designing executive dashboards and tailored data storytelling for strategic clarity;
- Ensuring accessibility and compliance in visualisation aligned to WCAG and regulatory standards.

BENEFITS

- Single point of reference for all data assets, analysis, reporting;
- Fine-grained access control enabling complete control of all data assets;
- Enhanced visibility of organisational data for improved decision-making;
- Business reporting consumed anywhere and on any device (desktop, mobile);
- Real-time updates/notifications on important business metrics or performance indicators;
- Intuitive, easy-to-use interfaces, making data insights accessible and understandable;
- Integrate multiple data-sets to assess performance, creating actionable insights;
- Time and cost savings from automated and visual reporting generation;
- Improved forecasting of operations and future business demands;
- Enhanced data security with version control for reporting solutions;
- Collaborative reporting features enabling shared insights across teams and stakeholders;
- Scalable reporting frameworks supporting growth and evolving business requirements;
- Compliance-ready reporting aligned to regulatory and industry standards.

OVERVIEW

Leidos' Data Visualisation and Reporting service delivers various reporting capabilities to our customers, provides business insights and enables the gathering, communication and visual representation of customer's data. This can be delivered in a centralised, secure gateway (information portal) that customers use to gain and share access to their data assets, dashboards, enterprise reporting, business intelligence (BI) and other information, or embedded as part of new or existing customer solutions.

This service provides our customers with better visibility of data and information across their organisations, enabling transparency and improved decision making, and it can be accessible via a web browser or mobile app, allowing customers to access information and insights into their business in a manner of their choosing. Our service also delivers BI reporting to be tailored, displayed and shared in way that caters to different stakeholders at all levels throughout the business, and more engaging and effective data story telling.

Our Data Visualisation and Reporting Service is tailored to customer infrastructure strategies, whether that be On-Cloud or Hybrid, and can be delivered as part of a wider Leidos Solution offering or via consultancy.

The solutions offered by Leidos include:

- Enterprise Reporting Services;
- Online Analytical Processing (OLAP) Services;
- Ad-Hoc Reporting Services;
- Dashboarding Services;
- Business Intelligence (BI) and Mobile BI Services;
- Real-Time Reporting Services;
- Geospatial Reporting and Visualisation Services;
- Data Storytelling Services;
- Conversational Chatbot for Analytics Services;
- Self-Service Reporting Services;
- Predictive and Advanced Analytics Reporting Services;
- Collaborative Reporting Services;
- Accessibility-Compliant Reporting Services;
- Executive Dashboard Design Services.

We are technology partners and experts in delivering programmes with established Cloud-Technology providers, such as AWS, Microsoft Azure, Google Cloud, and other technology leaders in the data area (Oracle, Tableau, Apache Spark, Splunk, Elastic and more), utilising COTS products and open-source technologies. Our offerings are tailored to customers' requirements and needs to provide maximum benefit to our customers with scalable, fit-to-purpose and cost efficient solutions

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements in order to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.

3 PRICING

Please refer to the associated Pricing Document relevant to this Service.

4 TERMS AND CONDITIONS

Please refer to the associated Terms and Conditions Document relevant for our Service Offerings.

5 FURTHER INFORMATION

Please send your requirement to publicsector@uk.leidos.com. Alternatively, if you wish to discuss your requirements in more detail, please send us the following information and we will be happy to contact you:

1. Your organisation name.
2. The name of this service.
3. Your name and contact details.
4. A brief description of your business situation.
5. Your preferred timescales for starting the work.

ABOUT LEIDOS

Leidos is a leading partner to the UK government and the Scottish government as well as having key client partners in transportation and energy.
