AWS Well Architected Review

1 WHAT THE SERVICE IS

Based in the six pillars of the AWS Well Architected Framework, the Leidos AWS Well Architected Review will help you ensure your cloud environment is configured according to best practices and fit to support your critical workloads. As a Premier Consulting Partner and AWS Consulting Partner of the year in 2021, you can be assured that we have the skills, knowledge and experience in Public Sector, National Security, Defence and Intelligence domains to provide a meaningful assessment and the insightful advice and guidance you need to optimise your AWS cloud IaaS and PaaS workloads.

Our experienced and qualified consultants will guide you through the review process and produce a clear and concise report highlighting area for improvement. We make recommendations on the actions that need to be taken. We can also help you to receive up to \$5,000 in AWS credits to assist with your remediation. The features and benefits of the Leidos AWS Well Architected Review can be found in Table 1.

Table 1: Features and Advantages

Feature Description	Benefit
Low Customer Effort, unobtrusive process	Minimally disruptive to you organisation and your mission but yielding significant results through the implementations of recommendations.
Clear, insightful report and recommendations	Simple steps to improve your cloud architecture and how your organisation supports it which will improve availability, reduce costs, optimise your use of AWS cloud.
Aligned to AWS Best Practice	All recommendations are aligned to the AWS best practice advice and guideline, so you can be sure you have the optimal configuration.
Delivered by qualified, accredited consultants: Leidos holds: ▶ 6 AWS Competencies ▶ 4 Partner Programmes ▶ 500+ Certifications	Our engagement will be effective and our recommendations straightforward and easy to understand and implement quickly which brings immediate improvement to your organisation across the 6 pillar focus areas
Promotes Sustainability	Reducing waste and increasing efficiency supports your net-zero / low-carbon agenda.
Up to \$5,000 in AWS credits to help with remediation	Once the process is complete, Leidos can apply to AWS on your behalf for AWS credits to help you remediate your environment based on the recommendations.

Leidos is proud to offer the aws well architected review, a service grounded in the six pillars of the aws well architected framework, designed to ensure your cloud environment is optimally configured to support your critical operations. As a premier consulting partner and aws consulting partner of the year in 2021, leidos brings unparalleled expertise in public sector, national security, defense, and intelligence domains, ensuring that your aws cloud iaas and paas workloads are assessed with the highest level of professionalism and insight.

Through our aws well architected review, our qualified consultants will meticulously guide you through the evaluation process, delivering a detailed report that not only highlights areas for improvement but also outlines actionable steps for enhancement. This service is specifically engineered to be minimally disruptive while providing maximum value, improving your cloud architecture's availability, cost-efficiency, and overall performance.

Choosing leidos for your aws architecture assessment means benefiting from a partnership that offers up to \$5,000 in aws credits to assist with any necessary remediations following our recommendations. This ensures that improvements are not just identified but also implemented, aligning your operations with aws best practices and advancing your journey towards sustainability and operational excellence. With leidos, you can trust that your cloud infrastructure is not only well-architected but also continuously evolving to meet the demands of an increasingly complex digital landscape.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements in order to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.
