Cloud Discover Service

1 WHAT THE SERVICE IS

Leidos will discover your technology and organisation using automated tooling and manual techniques to ensure it is fully understood as a standalone engagement or part of a cloud migration exercise. We will explore options for your future cloud estate based on existing technologies, processes and organisational structure.

FEATURES

- Automated tooling and manual techniques applied to your environment(s)
- Workshops and interviews to elicit details and high-value information
- Infrastructure and application baseline and assessment produced (the 6Rs)
- Technology Risks, Actions, Issues, Dependencies (RAID) log created
- Understanding of current people (skills), processes and technologies
- Cloud Architecture and landing zone approach and design agreed
- Cloud migration plan created including dependencies and migration waves
- Cloud migration programme governance agreed and documented
- Responsibility model defined for your cloud migration project / programme
- Migration tooling select agreed and Infrastructure as Code (IaC) created.

BENEFITS

- Solid migration basis through non-intrusive, rapid and accurate technology discovery
- Holistic view of "as-is" and "to-be" options for clarity
- Dependencies/risks identified early and prioritised for treatment reducing delivery risk
- People-focused and cultural change plans created and aligned to migration
- Architectures, designs, tools and IaC prepared to accelerate subsequent phases
- Governance and planning for following phases aligned to cultural change
- Roles and responsibilities agreed and communicated for cloud migration exercise.

OVERVIEW

Leidos presents a tailored Cloud Discover Service, meticulously designed to comprehensively analyse your existing technology and organisational structure. This service is crucial as a standalone engagement or as part of a broader cloud migration strategy. Utilising a combination of advanced automated tooling and detailed manual techniques, we ensure a thorough understanding of your current state, which paves the way for a seamless transition to the cloud.

Our Cloud Discover Service is robust, incorporating workshops, interviews, and detailed assessments (the "6Rs" - Rehost, Replatform, Rearchitect / Refactor, Repurchase, Retire, Retain) to not only map out your infrastructure and applications but also to identify any potential technology risks and dependencies. These insights are crucial for crafting a strategic cloud architecture and landing zone that align with your organisation's unique needs. Moreover, our methodical approach includes the creation of a cloud migration plan that details every aspect of the process, from dependencies to migration waves, ensuring that all elements are covered.

Opting for Leidos's Cloud Discover Service offers several key benefits. First, it provides a solid foundation for migration through a non-intrusive and accurate discovery process. It affords a comprehensive view of both your current operations and future possibilities, clarifying the path ahead. This thorough understanding helps in early identification and prioritisation of risks and dependencies, significantly reducing potential disruptions. Additionally, our service facilitates the alignment of your people, processes, and technologies with the planned cloud migration, ensuring that all aspects of your organisation are ready and responsive to change. By setting a clear governance structure and defining roles and responsibilities, Leidos ensures that your transition to the cloud is not only smooth but also strategically aligned with your long-term objectives. This proactive planning and execution enable rapid progression to subsequent migration phases, setting a strong precedent for success in your cloud endeavors.

2 ANY ONBOARDING AND OFFBOARDING SUPPORT YOU PROVIDE

Where relevant, Leidos will adopt a consultative approach with customers to define and validate their requirements to determine how best to engage with the services. The onboarding and offboarding process is dependent on the specific requirements of the solution, and the delivery methodology agreed upon.
